ISO 10406-1:2008-12 (E)

Fibre-reinforced polymer (FRP) reinforcement of concrete - Test methods - Part 1: FRP bars and grids

Contents

Page

Foreword v

1 Scope 1

2 Normative references 1

3 Terms, definitions and symbols 1
3.1 Terms and definitions 1
3.2 Symbols 5

4 General provision concerning test pieces 6

5 Test method for cross-sectional properties 6
5.1 Test pieces 6
5.2 Test method 7
5.3 Calculations 7
5.4 Test report 8

6 Test method for tensile properties 8
6.1 Test pieces 8
6.2 Test equipment 9
6.3 Test method 9
6.4 Calculations 10
6.5 Test report 11

7 Test method for bond strength by pull-out testing 13
7.1 Test pieces 13
7.2 Testing machine and devices 15
7.3 Test method 16
7.4 Calculations 17
7.5 Test report 17

8 Test method for performance of anchorages and couplers 18
8.1 Test method for performance of anchorages 18
8.2 Test method for performance of couplers 19
8.3 Test report 19

9 Test method for long-term relaxation 21
9.1 Test pieces 21
9.2 Testing frame and devices 21
9.3 Test temperature 22
9.4 Test method 22
9.5 Calculations 22
9.6 Test report 23

10 Test method for tensile fatigue 23
10.1 Test pieces 23
10.2 Testing machine and devices 24
10.3 Test temperature 24
10.4 Test method 24
10.5 Calculations 25

10.6 Test report 25
11 Test method for alkali resistance 26
11.1 Test pieces 26
11.2 Immersion in alkaline solution 26
11.3 External appearance and mass change 27
11.4 Tensile test 27
11.5 Calculations 27
11.6 Test report 28
12 Test method for creep failure 29
12.1 Test pieces 29
12.2 Testing frame and devices 29
12.3 Test temperature 29
12.4 Tensile capacity 29
12.5 Test method 29
12.6 Calculations 30
12.7 Test report 30
13 Test method for transverse shear strength 31
13.1 Test pieces 31
13.2 Testing machine and devices 31
13.3 Test temperature 33
13.4 Test method 33
13.5 Calculations 33
13.6 Test report 33
14 Test method for flexural tensile properties 34
14.1 Test pieces 34
14.2 Testing unit and devices 34
14.3 Test method 35
14.4 Calculations 35
14.5 Test report 35
15 Test method for the coefficient of longitudinal thermal expansion by thermo-mechanical analysis 37
15.1 Test pieces 37
15.2 Testing device 37
15.3 Test method 37
15.4 Calculations 38
15.5 Test report 39
