DIN EN 13501-4:2010-01 (E)

Fire classification of construction products and building elements - Part 4: Classification using data from fire resistance tests on components of smoke control systems (includes Amendment A1:2009)

Contents

Page

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 Fire scenarios 8
4.1 General 8
4.2 The standard temperature/time curve (post flash-over fire) 8
4.3 The slow heating curve (smouldering fire) 9
4.4 Constant temperature attack 9
4.5 Specific thermal actions 9
4.5.1 Smoke control ducts 9
4.5.2 Smoke control dampers 9
4.5.3 Smoke barriers 10
4.5.4 Powered smoke and heat exhaust ventilators 10
4.5.5 Natural smoke and heat exhaust ventilators 10

5 Resistance to fire performance characteristics 10
5.1 General 10
5.2 Performance characteristics 10
5.2.1 E - Integrity 10
5.2.2 I - Insulation 11
5.2.3 S - Smoke leakage 11
5.2.4 D - Stability duration under constant temperature 12
5.2.5 DH - Stability duration under the standard time-temperature curve 12
5.2.6 F - Functionality of powered smoke and heat ventilators 12
5.2.7 B - Functionality of natural smoke and heat ventilators 12

6 Declaration of performance 13
6.1 Classification periods 13
6.2 Designatory letters 13
6.3 Declaration of performance 13
6.4 Declaration of classes in product standards 13
6.5 Number of tests required for classification 13
6.6 !Presentation of classification" 14

7 Classification procedure for fire resistance 14
7.1 General 14
7.1.1 Procedure 14
7.1.2 General rules for deducing the number of fire resistance tests 14
7.1.3 !Field of application" 15
7.2 Classification of smoke control ducts 15
7.2.1 General 15
7.2.2 !Test methods and field of application rules" 15

7.2.3 Tests to be carried out 15
7.2.4 Performance criteria 16
7.2.5 Classes 17
7.3 Classification of smoke control dampers 17
7.3.1 General 17
7.3.2 !Test method and field of application rules" 18
7.3.3 Tests to be carried out 18
7.3.4 Performance criteria 18
7.3.5 Classes 21
7.4 Classification of smoke barriers 22
7.4.1 General 22
7.4.2 Test method 22
7.4.3 Tests to be carried out 22
7.4.4 Performance criteria 23
7.4.5 Classes 23
7.5 Classification of powered smoke and heat exhaust ventilators 23
7.5.1 Test method 23
7.5.2 Tests to be carried out 23
7.5.3 Performance criteria 23
7.5.4 Classes 24
7.6 Classification of natural smoke and heat exhaust ventilators 24
7.6.1 Test method 24
7.6.2 Tests to be carried out 24
7.6.3 Performance criteria 24
7.6.4 Classes 24

Annex A (normative) Classification report 25

A.1 General 25
A.2 Content and format 25
