## Hygrothermal performance of buildings - Calculation and pre sentation of climatic data - Part 3: Calculation of a driving rain index for vertical surfaces from hourly wind and rain data

---

| <b>Contents</b>  |  | <b>Page</b> |
|--|--|-------------|
| Foreword .....   |  | iv          |
| Introduction .....   |  | v           |
| 1  | Scope .....  | 1           |
| 2  | Terms, definitions, symbols and units .....  | 2           |
| 3  | Calculation of airfield indices from hourly wind and rain data .....                               | 4           |
| 4  | Estimation of the effect of driving rain from average wind and present weather code for rain ..... | 4           |
| 5  | Calculation of wall indices .....  | 5           |
| Annex A (informative) Limits to the validity of the calculated indices .....   |  | 11          |
| Annex B (informative) The nature of a "spell" of driving rain .....            |  | 12          |
| Annex C (informative) The procedure for generating the driving-rain maps ..... |  | 13          |
| Annex D (informative) Comparison of methods specified in Clauses 3 and 4 ..... |  | 15          |
| Bibliography .....   |  | 17          |
