ISO/TR 15658:2009-08 (E)

Fire resistance tests - Guidelines for the design and conduct of non-furnace-based large-scale tests and simulation

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Test design requirements 2
4.1 General 2
4.2 Ambient environmental conditions 2
4.3 Size of the test assembly 3
4.4 Construction of the test assembly 4
4.5 Test specimen 5
4.6 Selection of heating conditions 6
4.7 Selection of ventilation conditions 7
4.8 Selection of exhaust conditions 7
4.9 Selection of decay conditions (if controlled) 8

5 Test conditions 8
5.1 Ambient conditions 8
5.2 Test conditions -- Thermal 9
5.3 Test conditions -- Pressure 9
5.4 Test conditions -- Mechanical 10
5.5 Timing of the test 10
5.6 Output measurements 10
5.7 Data recording and storage 11

6 Test procedure 11
6.1 Ignition 11
6.2 Safety procedures 11
6.3 Monitoring 11
6.4 Observations 12
6.5 Termination and extinguishing 12
6.6 Post-test analysis 12

7 Test report 12
7.1 Stating the objective 12
7.2 Characterization of the experimental conditions 12
7.3 Expression of the results 12
7.4 Description of the test specimen 13
7.5 Reporting -- Electronic media 13
7.6 Expression of the validity or field of application of the result 13
