## Fire resistance tests - Guidelines for the design and conduct of non-furnace-based large-scale tests and simulation

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Test design requirements .....	2
4.1	General .....	2
4.2	Ambient environmental conditions .....	2
4.3	Size of the test assembly .....	3
4.4	Construction of the test assembly .....	4
4.5	Test specimen .....	5
4.6	Selection of heating conditions .....	6
4.7	Selection of ventilation conditions .....	7
4.8	Selection of exhaust conditions .....	7
4.9	Selection of decay conditions (if controlled) .....	8
5	Test conditions .....	8
5.1	Ambient conditions .....	8
5.2	Test conditions -- Thermal .....	9
5.3	Test conditions -- Pressure .....	9
5.4	Test conditions -- Mechanical .....	10
5.5	Timing of the test .....	10
5.6	Output measurements .....	10
5.7	Data recording and storage .....	11
6	Test procedure .....	11
6.1	Ignition .....	11
6.2	Safety procedures .....	11
6.3	Monitoring .....	11
6.4	Observations .....	12
6.5	Termination and extinguishing .....	12
6.6	Post-test analysis .....	12
7	Test report .....	12
7.1	Stating the objective .....	12
7.2	Characterization of the experimental conditions .....	12
7.3	Expression of the results .....	12
7.4	Description of the test specimen .....	13
7.5	Reporting -- Electronic media .....	13
7.6	Expression of the validity or field of application of the result .....	13
Bibliography .....		14
