# DIN EN 459-2:2010-12 (E)

## Building lime - Part 2: Test methods

## Contents

Page

Foreword ..... 3

Introduction ..... 4

1 Scope ..... 5

2 Normative references ..... 5

3 Sampling ..... 5
3.1 General ..... 5
3.2 Sampling of powdered material ..... 5
3.3 Sampling of granular material ..... 5
3.4 Sampling of lime putty and milk of lime ..... 5
3.5 Preparation of the test portion ..... 6

4 General requirements for testing ..... 6
4.1 Number of tests ..... 6
4.2 Repeatability and reproducibility ..... 7
4.3 Expression of masses, volumes, factors and results ..... 7
4.4 Blank determinations ..... 7
4.5 Reagents ..... 7
4.6 Evaluation of test results ..... 8

5 Chemical analysis ..... 8
5.1 Extraction with hydrochloric acid ..... 8
5.2 Calcium oxide (CaO) and magnesium oxide (MgO) ..... 9
5.3 Sulfate (expressed as SO3) ..... 12
5.4 Free water ..... 14
5.5 Gravimetric determination of carbon dioxide (CO2) (reference method) ..... 15
5.6 Volumetric determination of carbon dioxide (CO2) (alternative method) ..... 18
5.7 Loss on ignition ..... 21
5.8 Available lime ..... 22

6 Physical tests ..... 24
6.1 Particle size by dry sieving ..... 24
6.2 Particle size by air-jet sieving ..... 25
6.3 Bulk density ..... 27
6.4 Soundness ..... 30
6.5 Setting times ..... 37
6.6 Reactivity ..... 41
6.7 Yield ..... 47
6.8 Standard mortar by mass and water demand for values of flow and penetration ..... 48
6.9 Water retention ..... 53
6.10 Determination of air content ..... 55
6.11 Compressive strength ..... 57

Annex A (informative) Example for the calculation of the results on sieving ..... 61

Annex B (informative) Precision data for the test methods ..... 62

Bibliography ..... 64
