

# DIN EN 1520:2011-06 (E)

## Prefabricated reinforced components of lightweight aggregate concrete with open structure with structural or non-structural reinforcement

---

<b>Contents</b>		<b>Page</b>
Foreword .....		7
<b>1</b>	<b>Scope .....</b>	<b>10</b>
<b>2</b>	<b>Normative references .....</b>	<b>10</b>
<b>3</b>	<b>Terms, definitions, symbols and abbreviations .....</b>	<b>13</b>
3.1	Terms and definitions .....	13
3.2	Symbols .....	13
3.2.1	General symbols .....	13
3.2.2	Subscripts .....	14
3.2.3	Symbols used in this European Standard .....	14
3.3	Abbreviations .....	19
3.4	Units .....	19
<b>4</b>	<b>Properties and requirements of materials .....</b>	<b>20</b>
4.1	Constituents .....	20
4.1.1	General .....	20
4.1.2	Release of dangerous substances .....	20
4.2	Lightweight aggregate concrete parameters .....	20
4.2.1	Dry density .....	20
4.2.2	Characteristic strength values .....	21
4.2.3	Compressive strength .....	21
4.2.4	Flexural strength and uniaxial tensile strength .....	23
4.2.5	Stress-strain diagram .....	23
4.2.6	Modulus of elasticity .....	24
4.2.7	Poisson's ratio .....	24
4.2.8	Coefficient of thermal expansion .....	24
4.2.9	Drying shrinkage .....	24
4.2.10	Creep .....	25
4.2.11	Thermal conductivity .....	25
4.2.12	Water vapour permeability .....	27
4.2.13	Water tightness .....	27
4.3	Reinforcement steel .....	27
<b>5</b>	<b>Properties and requirements of components .....</b>	<b>28</b>
5.1	General .....	28
5.1.1	Mechanical resistance .....	28
5.1.2	Deflections .....	28
5.1.3	Acoustic properties .....	28
5.1.4	Reaction to fire and resistance to fire .....	29
5.1.5	Design thermal resistance and design thermal conductivity .....	29
5.2	Types of components .....	30
5.2.1	General .....	30
5.2.2	Roof and floor components .....	31
5.2.3	Wall components .....	31
5.2.4	Beams and piers .....	31
5.2.5	Other prefabricated components .....	31
5.3	Detailing, technical requirements, and declared properties .....	31
5.3.1	Detailing .....	31
5.3.2	Dimensions and tolerances .....	31

5.3.3	Mass of the components .....	32
5.3.4	Deflections .....	32
5.3.5	Strength of joints .....	32
5.3.6	Minimum requirements .....	32
5.3.7	Reinforcement detailing .....	32
5.4	Additional requirements for roof and floor components and beams .....	33
5.4.1	Minimum dimensions .....	33
5.4.2	Minimum requirements for structural reinforcement .....	33
5.4.3	Support length .....	34
5.5	Additional requirements for wall components .....	35
5.5.1	General .....	35
5.5.2	Walls with non-structural reinforcement .....	35
5.5.3	Walls with structural reinforcement .....	35
5.6	Durability .....	36
5.6.1	General .....	36
5.6.2	Minimum cover with regard to bond .....	37
5.6.3	Exposure classes related to environmental conditions .....	37
5.6.4	Corrosion protection of reinforcement .....	38
5.6.5	Freeze-thaw resistance .....	40
6	Evaluation of conformity .....	40
6.1	Introduction .....	40
6.2	Initial type-testing of the component .....	41
6.2.1	General .....	41
6.2.2	Sharing of results from ITT .....	41
6.3	Factory production control .....	42
6.3.1	General .....	42
6.3.2	Process control .....	42
6.3.3	Finished products .....	42
6.4	Initial inspection of the factory and the factory production control .....	43
6.4.1	Information to be supplied .....	43
6.4.2	Inspection .....	43
6.4.3	Reports .....	43
6.5	Surveillance, assessment and approval of the factory production control .....	43
6.5.1	Inspection tasks .....	43
6.5.2	Frequency of inspections .....	43
6.5.3	Reports .....	44
6.6	Actions to be taken in the event of non-conformity .....	44
7	Basis for design .....	50
7.1	Design methods .....	50
7.2	Limit states .....	50
7.3	Actions .....	50
8	Marking, labelling and designation .....	51
8.1	Standard designation .....	51
8.2	Additional information on accompanying documents .....	52
Annex A (normative) Design of components by calculation .....		53
Annex B (informative) Design of components by testing .....		81
Annex C (informative) Recommended values for partial safety factor .....		87
Annex ZA (informative) Provisions for the CE marking of prefabricated components of lightweight aggregate concrete with open structure with structural or non-structural reinforcement under the EU Construction Product Directive .....		88
Bibliography .....		109
Figures Figure 1 -- Determination of dry thermal conductivity 10dry .....		26

Figure 2 -- Examples of multilayer slab, hollow core slab and solid slab (With respect to transverse reinforcement, see 5.4.2.1) .....	34
Figure 3 -- Support length $a_0$ .....	35
Figure 4 -- Basic design of hollow core wall components .....	36
Figure A.1 -- Bi-linear stress-strain diagram for LAC in compression for cross-sectional design .....	55
Figure A.2 -- Design stress-strain diagram for reinforcement steel .....	56
Figure A.3 -- Possible strain diagrams in the ultimate limit state .....	56
Figure A.4 -- Limits of slenderness ratio $S$ of loadbearing walls and piers .....	62
Figure A.5 -- Design loads for cellar walls .....	67
Figure A.6 -- Additional horizontal force $H_{fd}$ due to inclination of the components and effects of second order theory .....	72
Figure A.7 -- Tensile splitting forces in wall components with oversail $s$ .....	73
Figure A.8 -- Tensile splitting forces at the top of a hollow core wall component .....	74
Figure A.9 -- Tensile splitting force $T$ due to centric loading .....	75
Figure A.10 -- Anchorage of smooth reinforcing bars .....	79
Figure A.11 -- Anchorage of ribbed reinforcing bars .....	79
Figure B.1 -- Definition of shear span $l_s$ .....	83
Figure B.2 -- Simplified / interaction diagram of the cross-section, representing results of three test series .....	86
Figure ZA 1 - Example of CE marking with Method 1 .....	101
Figure ZA 2 - Example of CE marking with Method 2 .....	103
Figure ZA.3 - Example of CE marking with Method 3a .....	105
Figure ZA.4 - Example of CE marking with Method 3b .....	107
Figure ZA.5 -- Example of simplified label .....	108
Tables Table 1 -- Tolerances on declared mean dry density of LAC .....	20
Table 2 -- Density classes of LAC .....	21
Table 3 -- Determination of the characteristic strength $f_k$ and required minimum strength $f_{min}$ .....	21
Table 4 -- Statistical coefficient $K_n$ for determination of characteristic strength .....	22
Table 5 -- Reduction factors for compressive strength of cores with indicated diameter and equal length of cubes .....	22
Table 6 -- Conversion factors for conversion of test results of cast test specimens to the strength of reference test specimens (drilled cores of 100 mm diameter and length or 100 mm cubes) .....	22
Table 7 -- Strength classes and strength requirements for LAC .....	23

Table 8 -- Dry thermal conductivity 10dry of LAC for 50 % and 90 % of production, with a confidence level = 90 % (compiled according to EN 1745) .....	27
Table 9 -- Basic values for moisture content and moisture conversion coefficient of LAC (compiled according to EN ISO 10456) .....	29
Table 10 -- Types of components .....	30
Table 11 -- Maximum permissible deviation from squareness in the plane of components .....	32
Table 12 -- Minimum percentage of reinforcement R .....	33
Table 13 -- Description of permissible exposure classes with respect to risk of reinforcement corrosion .....	37
Table 14 -- Embedding in a zone of normal concrete or LC-concrete with closed structure - Minimum concrete cover in mm .....	38
Table 15 -- Minimum concrete cover in mm for hot dip galvanized reinforcement steel .....	39
Table 16 -- Minimum concrete cover in mm with regard to durability and test method to pass by initial type-test and FPC for bars with a corrosion protective coating .....	40
Table 17 -- Initial type-testing of the LAC components .....	45
Table 18 -- Factory production control, testing of the finished product LAC components for structural uses .....	46
Table 19 -- Factory production control, testing of the finished product, LAC components for non-loadbearing uses .....	48
Table A.1 -- Minimum percentages of shear reinforcement $w_{min}$ for reinforcement steel with $f_{yk}=500$ MPa .....	60
Table A.2 -- Coefficient for the determination of the buckling length $l_0$ at different boundary conditions (used in Equation (A. 25), $l_0 = \cdot l_w$ ) .....	64
Table A.3 -- Required dimensions of beams without verification of loadbearing capacity .....	71
Table A.3 -- Limits of reinforcement in roof and floor components for design by calculation (plain steel, with characteristic yield strength $f_{yk} 220$ MPa) .....	78
Table C.1 -- Partial safety factors M for material properties .....	87
Table C.2 -- Partial safety factors comp for components .....	87
Table ZA.1a -- Harmonised clauses for loadbearing wall components .....	89
Table ZA.1b -- Harmonised clauses for retaining wall components .....	90
Table ZA.1c -- Harmonised clauses for roof components .....	91
Table ZA.1d -- Harmonised clauses for floor components .....	92
Table ZA.1e -- Harmonised clauses for linear components .....	93
Table ZA.1f -- Harmonised clauses for non-loadbearing wall components .....	94
Table ZA.1g -- Harmonised clauses for cladding components .....	95
Table ZA.1h -- Harmonised clauses for small box culvert components .....	96

**Table ZA.2a -- Systems of attestation of conformity .....97**

**Table ZA.2b -- Assignment of evaluation of conformity tasks (for structural components) under system 2+ ..... 97**

**Table ZA.2c -- Assignment of evaluation of conformity tasks (for non structural or light structural components) under System 4 .....98**
