

# DIN EN 1992-2:2010-12 (E)

## Eurocode 2: Design of concrete structures - Part 2: Concrete bridges - Design and detailing rules (includes Corrigendum AC:2008)

---

| <b>Contents</b>   | <b>Page</b> |
|---|-------------|
| Foreword .....  | 5           |
| SECTION 1 General .....                                       | 7           |
| 1.1 Scope .....   | 7           |
| 1.1.2 Scope of Part 2 of Eurocode 2 .....                     | 7           |
| 1.106 Symbols .....   | 7           |
| SECTION 2 Basis of Design .....                               | 13          |
| SECTION 3 Materials .....                                     | 13          |
| 3.1 Concrete .....  | 13          |
| 3.1.2 Strength .....  | 13          |
| 3.1.6 Design compressive and tensile strengths .....          | 13          |
| 3.2 Reinforcing steel .....                                   | 14          |
| 3.2.4 Ductility characteristics .....                         | 14          |
| SECTION 4 Durability and cover to reinforcement .....         | 15          |
| 4.2 Environmental conditions .....                            | 15          |
| 4.3 Requirements for durability .....                         | 15          |
| 4.4 Methods of verifications .....                            | 15          |
| 4.4.1 Concrete cover .....                                    | 15          |
| 4.4.1.2 Minimum cover, $c_{min}$ .....                        | 15          |
| SECTION 5 Structural analysis .....                           | 17          |
| 5.1 General .....   | 18          |
| 5.1.1 General requirements .....                              | 18          |
| 5.1.3 Load cases and combinations .....                       | 18          |
| 5.2 Geometric imperfections .....                             | 18          |
| 5.3 Idealisation of the structure .....                       | 18          |
| 5.3.1 Structural models for overall analysis .....            | 18          |
| 5.3.2 Geometric data .....                                    | 18          |
| 5.3.2.2 Effective span of beams and slabs .....               | 18          |
| 5.5 Linear elastic analysis with limited redistribution ..... | 19          |
| 5.6 Plastic analysis .....                                    | 19          |
| 5.6.1 General .....   | 19          |
| 5.6.2 Plastic analysis for beams, frames and slabs .....      | 20          |
| 5.6.3 Rotation capacity .....                                 | 20          |
| 5.7 Non-linear analysis .....                                 | 20          |
| 5.8 Analysis of second order effects with axial load .....    | 21          |
| 5.8.3 Simplified criteria for second order effects .....      | 21          |
| 5.8.3.3 Global second order effects in buildings .....        | 21          |
| 5.8.4 Creep .....   | 21          |
| 5.10 Prestressed members and structures .....                 | 21          |
| 5.10.1 General .....  | 21          |
| 5.10.8 Effects of prestressing at ultimate limit state .....  | 21          |
| SECTION 6 Ultimate Limit States (ULS) .....                   | 22          |

|   |   |           |
|---|---|-----------|
| 6.1   | Bending with or without axial force .....                             | 22        |
| 6.2   | Shear .....   | 24        |
| 6.2.2   | Members not requiring design shear reinforcement .....                | 24        |
| 6.2.3   | Members requiring design shear reinforcement .....                    | 25        |
| 6.2.4   | Shear between web and flanges of T-sections .....                     | 28        |
| 6.2.5   | Shear at the interface between concrete cast at different times ..... | 29        |
| 6.2.106   | Shear and transverse bending .....                                    | 29        |
| 6.3   | Torsion .....   | 29        |
| 6.3.2   | Design procedure .....  | 29        |
| 6.7   | Partially loaded areas .....  | 32        |
| 6.8   | Fatigue .....   | 32        |
| 6.8.1   | Verification conditions .....   | 32        |
| 6.8.4   | Verification procedure for reinforcing and prestressing steel .....   | 33        |
| 6.8.7   | Verification of concrete under compression or shear .....             | 33        |
| 6.109   | Membrane elements .....   | 34        |
| <b>SECTION 7 Serviceability Limit States (SLS) .....</b>                              |   | <b>36</b> |
| 7.2   | Stresses .....  | 36        |
| 7.3   | Crack control .....   | 36        |
| 7.3.1   | General considerations .....  | 36        |
| 7.3.2   | Minimum reinforcement areas .....                                     | 37        |
| 7.3.3   | Control of cracking without direct calculation .....                  | 39        |
| 7.3.4   | Calculation of crack widths .....                                     | 39        |
| 7.4   | Deflection control .....  | 39        |
| 7.4.1   | General considerations .....  | 39        |
| <b>SECTION 8 Detailing of reinforcement and prestressing tendons -- General .....</b> |   | <b>40</b> |
| 8.9   | Bundled bars .....  | 41        |
| 8.9.1   | General .....   | 41        |
| 8.10  | Prestressing tendons .....  | 41        |
| 8.10.3  | Anchorage zones of post-tensioned members .....                       | 41        |
| 8.10.4  | Anchorage and couplers for prestressing tendons .....                 | 41        |
| <b>SECTION 9 Detailing of members and particular rules .....</b>                      |   | <b>43</b> |
| 9.1   | General .....   | 43        |
| 9.2   | Beams .....   | 43        |
| 9.2.2   | Shear reinforcement .....   | 43        |
| 9.5   | Columns .....   | 44        |
| 9.5.3   | Transverse reinforcement .....  | 44        |
| 9.7   | Deep beams .....  | 44        |
| 9.8   | Foundations .....   | 44        |
| 9.8.1   | Pile caps .....   | 44        |
| 9.10  | Tying systems .....   | 44        |
| <b>SECTION 10 Additional rules for precast concrete elements and structures .....</b> |   | <b>45</b> |
| 10.1  | General .....   | 45        |
| 10.9  | Particular rules for design and detailing .....                       | 45        |
| 10.9.7  | Tying systems .....   | 45        |
| <b>SECTION 11 Lightweight aggregate concrete structures .....</b>                     |   | <b>46</b> |
| 11.9  | Detailing of members and particular rules .....                       | 46        |
| <b>SECTION 12 Plain and lightly reinforced concrete structures .....</b>              |   | <b>46</b> |
| <b>SECTION 113 Design for the execution stages .....</b>                              |   | <b>47</b> |

|  |                                   |    |
|--|-----------------------------------|----|
| 113.1  | General .....                     | 47 |
| 113.2  | Actions during execution .....    | 47 |
| 113.3  | Verification criteria .....       | 47 |
| 113.3.1  | Ultimate limit states .....       | 47 |
| 113.3.2  | Serviceability limit states ..... | 48 |
| ANNEX A (informative) Modification of partial factors for materials .....                        |                                   | 49 |
| ANNEX B (informative) Creep and shrinkage strain .....   |                                   | 49 |
| ANNEX C (normative) Properties of reinforcement suitable for use with this Eurocode .....        |                                   | 55 |
| ANNEX D (informative) Detailed calculation method for prestressing steel relaxation losses ..... |                                   | 55 |
| Annex E (informative) Indicative strength classes for durability .....                           |                                   | 55 |
| Annex F (Informative) Tension reinforcement expressions for in-plane stress conditions .....     |                                   | 56 |
| Annex G (informative) Soil structure interaction .....   |                                   | 58 |
| Annex H (informative) Global second order effects in structures .....                            |                                   | 58 |
| Annex I (informative) Analysis of flat slabs and shear walls .....                               |                                   | 59 |
| Annex J (informative) Detailing rules for particular situations .....                            |                                   | 60 |
| Annex KK (informative) Structural effects of time dependent behaviour of concrete .....          |                                   | 63 |
| Annex LL (informative) Concrete shell elements .....   |                                   | 68 |
| Annex MM (informative) Shear and transverse bending .....  |                                   | 75 |
| Annex NN (informative) Damage equivalent stresses for fatigue verification .....                 |                                   | 77 |
| ANNEX OO (informative) Typical bridge discontinuity regions .....                                |                                   | 86 |
| Annex PP (informative) Safety format for non linear analysis .....                               |                                   | 92 |
| Annex QQ (informative) Control of shear cracks within webs .....                                 |                                   | 95 |
