Foreword 3

NA 1 Scope 4

NA 2.1 General 4

NA 2.2 National provisions 5

Annex NA.A (informative) Simplified design rules for simple bridges 10

NA.A.1 General 10

NA.A.2 Determination of horizontal seismic forces 11

NA.A.2.1 General 11

NA.A.2.2 Excitation in the longitudinal direction -- use of movable bearings at the abutment 11

NA.A.2.3 Excitation in the longitudinal direction -- use of fixed bearings at the abutment 12

NA.A.2.4 Excitation in the transverse direction 12

NA.A.3 Combination of action effects due to the components of the seismic action 14

NA.A.4 Torsional effects (rotation about the vertical axis) 14

NA.A.5 Displacements, joints, minimum bearing lengths 15

NA.A.5.1 Relative displacements 15

NA.A.5.2 Joints 15

NA.A.5.3 Minimum overlap length 16

NA.A.6 Stability analysis 16

NA.A.7 Abutments and retaining walls 17

NA.A.7.1 Abutments flexibly connected to the deck 17

NA.A.7.2 Abutments rigidly connected to the deck 18

NA.A.8 Bearings 18

NA.A.8.1 Fixed bearings 18

NA.A.8.2 Movable bearings 18

NA.A.8.3 Elastomeric bearings 18

NA.A.9 Avoidance of brittle fracture of specific non-ductile components 19

NA.A.10 Specific rules for concrete members 19

NA.A.10.1 General 19

NA.A.10.2 Confining reinforcement in piers 19
