

DIN EN 410:2011-04 (E)

Glass in building - Determination of luminous and solar characteristics of glazing

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms and definitions	5
4	Symbols	6
5	Determination of characteristics	8
5.1	General	8
5.2	Light transmittance	8
5.3	Light reflectance	11
5.4	Total solar energy transmittance (solar factor)	12
5.4.1	Calculation	12
5.4.2	Division of incident solar radiant flux	12
5.4.3	Solar direct transmittance	14
5.4.4	Solar direct reflectance	14
5.4.5	Solar direct absorptance	14
5.4.6	Secondary heat transfer factor towards the inside	14
5.5	UV-transmittance	19
5.6	Colour rendering	19
5.7	Shading coefficient	22
6	Expression of results	23
7	Test report	23
Annex A (normative)	Procedures for calculation of the spectral characteristics of glass plates with a different thickness and/or colour	33
Annex B (normative)	Procedure for calculation of the spectral characteristics of laminated glass	38
Annex C (informative)	Procedure for calculation of the spectral characteristics of screen printed glass	59
Annex D (informative)	Example of calculation of colour rendering index	60
Bibliography		64
