

DIN EN 16012:2012-04 (E)

Thermal insulation for buildings - Reflective insulation products - Determination of the declared thermal performance

Contents		Page
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms, definitions, symbols and units	7
3.1	Terms and definitions	7
3.2	Symbols and units	7
4	Description of product types	8
4.1	Product classification	8
4.2	Product Type 1	8
4.3	Product Type 2	9
4.4	Product Type 3	9
4.5	Product Type 4	10
5	Methods of assessment	10
5.1	General	10
5.2	Thickness measurement	10
5.3	Conditioning and specimen preparation	11
5.4	Determination of thermal resistance - outline	11
5.5	Determination of core thermal resistance of Product Type 1	11
5.6	Determination of core thermal resistance of Product Type 2	12
5.7	Determination of core thermal resistance of Product Type 3 (METHOD C)	13
5.8	Determination of the thermal performance of Product Type 4	17
5.9	Emissivity	17
6	Uncertainty	18
6.1	General	18
6.2	Thickness measurements	18
6.3	Use of surface thermocouples on thin samples in a guarded hot plate or in heat flow meter measurement	19
6.4	Use of dummy insulation specimens	19
6.5	Derivation of the core resistance of a Type 3 Product from hot box measurements	19
7	Expression of results	19
7.1	Results derived from hot plate and emissivity measurements (Products Type 1 & 2)	19
7.2	Results derived from hot box and emissivity measurements (Product Types 1, 2 & 3)	20
7.3	Results derived from emissivity measurements only (product Type 4)	20
8	Report	20
Annex A (normative) Decision making flow chart for identification of product types		21
Annex B (normative) Selection of test methodology for product type 1 when using a hot plate method		22
Annex C (normative) Selection of the measurement technique for product type 2		23

Annex D (normative) Measurement of emissivity using a Thermal Infra-Red apparatus	24
D.1 Principle of the hemispherical blackbody radiator	24
D.2 Description of suitable hemispherical blackbody radiator and specimen holder	25
D.3 Calibration standards	25
D.4 Calculation of the emissivity	26
D.5 Sampling and preparation of the test specimens	26
D.6 Procedure for measurement of specimens	26
D.7 Expression of results	27
Annex E (normative) "Dummy specimen" technique for the heat flow meter apparatus	28
E.1 Principle	28
E.2 Procedure	28
E.3 Specimens of low thermal resistance	29
E.4 Calibration	29
Bibliography	30
