# DIN EN 1745:2012-07 (E)

## Masonry and masonry products - Methods for determining thermal properties

## Contents

Page

Foreword ....4

Introduction ....5

1 Scope ....7

2 Normative references ....7

3 Terms, definitions and symbols ....7
3.1 Terms and definitions ....7
3.2 Symbols ....9
3.3 Subscripts ....10

4 Procedures to determine 10,dry, unit-values for solid masonry units and 10,dry,mor-values for mortars ....11
4.1 General ....11
4.2 10,dry, mat-values for solid masonry units and mortars ....11
4.2.1 Model S1. Determination of 10,dry,unit-values from tabulated 10,dry,mat /net dry density relation ....11
4.2.2 Model S2. Determination of 10,dry,unit-values based on 10,dry,mat /net dry density curve ....11
4.2.3 Model S3. Procedures to determine 10,dry,unit-values from determining the thermal transmittance (Umas) of masonry built from solid masonry units and mortar ....13
4.3 Test methods and numbers of samples to be taken for the different models ....14

5 Procedures to determine equivalent 10,dry,unit-values for masonry units with formed voids and composite masonry units ....14
5.1 General ....14
5.2 Calculation methods ....15
5.3 10,dry,unit-values of masonry units ....15
5.3.1 Determination of 10,dry,unit-values from tabulated unit /mat relation ....15
5.3.2 Determination of 10,dry,unit-values based on calculation ....16
5.3.3 Model P5. Determination of 10,dry,unit-values from determining the thermal transmittance (Umas) of masonry built from masonry units with formed voids or composite masonry units and mortar ....16
5.4 Test methods and numbers of samples to be taken for the different models ....19

6 Moisture conversion ....19

7 Procedures to determine design thermal values (Rdesign,mas or design, mas) for masonry built from masonry units and mortar ....20
7.1 General ....20
7.2 Rdesign,mas- or design,mas-values based on calculation ....20
7.3 Rdesign,mas- or design,mas-values of masonry built from masonry units with formed voids or composite masonry units and mortar based on tabulated values ....21
7.3.1 Tabulated values ....21

8. Determination of the thermal transmittance of masonry ....23

9. Specific heat capacity ....23

10. Rounding rules for -values for masonry ....23

**Annex A (normative) Tabulated 10,dry,mat-values of materials used for masonry products ..... 24**

**Annex B (informative) Rdry,mas- or 10,dry,mas-values of masonry built from a range of masonry units containing formed voids ..... 35**

**Annex C (informative) Example of how to use the tables in Annex B ..... 62**

**Annex D (normative) Requirements for appropriate calculation procedures ..... 64**

**D.1 Capabilities of the program ..... 64**
**D.2 Input data and results ..... 64**
**D.3 Testing of the program accuracy ..... 65**
**D.4 Reference cases ..... 65**

**Annex E (informative) Evaluation of conformity ..... 73**

**Annex F (informative) Alternative procedure for the moisture correction of units with formed voids 75**

**Bibliography ..... 76**
