

ISO 22389-2:2012-01 (E)

Timber structures - Bending applications of I-beams - Part 2: Component performance and manufacturing requirements

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Component requirements	2
4.1	Flange stock	2
4.2	Web material	2
4.3	Adhesives	2
5	Manufacturing requirements	2
5.1	General	2
5.2	Dimensional tolerances	2
6	In-house quality assurance	3
6.1	Manufacturing standard	3
6.2	I-beam quality control testing	3
7	Qualification and quality assurance of I-beam components manufactured by others	4
7.1	Producer's responsibility	4
7.2	Record keeping	4
7.3	Identification	4
8	Periodic reevaluation of structural capacities	5
8.1	Reevaluation required	5
8.2	Minimum database in periodic evaluation	5
8.3	Data analysis	5
9	Identification	6
