DIN 18134:2012-04 (E)

Soil - Testing procedures and testing equipment - Plate load test

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Designation 6

5 Apparatus 6
5.1 General 6
5.2 Reaction loading system 6
5.3 Loading plates 7
5.4 Loading system 8
5.5 Force-measuring apparatus 8
5.6 Settlement-measuring device 9
5.7 Ancillary equipment 11
5.8 Calibration of plate loading apparatus and functional testing 11

6 Test conditions 11

7 Procedure for plate load test 11
7.1 Test area preparation 11
7.2 Setting up the plate loading apparatus 11
7.3 Arrangement of settlement-measuring device 12
7.4 Preloading 12
7.5 Loading and unloading 12
7.5.1 General 12
7.5.2 Determining the strain modulus EV 12
7.5.3 Determining the modulus of subgrade reaction, ks 13

8 Evaluation and representation of results 13
8.1 Load-settlement curve 13
8.2 Calculation of strain modulus EV 14
8.3 Calculation of modulus of subgrade reaction ks 15

9 Examples of application 15
9.1 Determination of strain modulus EV 15
9.2 Determination of modulus of subgrade reaction ks 18

Annex A (normative) Calibration of plate loading apparatus 20

A.1 General 20
A.2 Check of plate loading apparatus for compliance with requirements 20
A.3 Apparatus and equipment used for calibration and functional testing 20
A.3.1 Force-measuring system 20
A.3.2 Settlement-measuring device 21
A.4 Calibration and functional test 21
A.4.1 Force-measuring system 21
A.4.2 Settlement-measuring device 22
A.5 Calibration report 22

Annex B (informative) Principles underlying the normal equations for calculation of the constants of the second degree polynomial for the load settlement curve and for calculation of the strain modulus EV 24
