

DIN EN ISO 19143:2012-06 (E)

Geographic information - Filter encoding (ISO 19143:2010); English version EN ISO 19143:2012

Inhalt	Seite
Foreword	5
Introduction.....	6
1 Scope	7
2 Conformance	7
3 Normative references	8
4 Terms and definitions	9
5 Conventions	12
5.1 Abbreviated terms	12
5.2 UML notation.....	12
5.3 Use of examples	14
5.4 Namespaces.....	14
5.5 KVP-encoded parameter lists	14
5.6 XML Schema fragments.....	14
6 Query expressions	14
6.1 General	14
6.2 Abstract query expressions	15
6.3 Ad hoc query expression	15
6.3.1 General considerations.....	15
6.3.2 XML encoding	16
6.3.3 KVP-encoding	16
7 Filter	19
7.1 General considerations.....	19
7.2 Encoding	20
7.3 Expressions	20
7.3.1 General considerations.....	20
7.3.2 Encoding	21
7.4 Value references.....	21
7.4.1 General considerations.....	21
7.4.2 Encoding	21
7.4.3 Property names in GML	22
7.4.4 XPath expressions	22
7.5 Literals	23
7.5.1 General considerations.....	23
7.5.2 Encoding	24
7.6 Functions	24
7.6.1 General considerations.....	24
7.6.2 Encoding	24
7.7 Comparison operators.....	25
7.7.1 General considerations.....	25
7.7.2 Encoding	26
7.7.3 Parameter discussion	27
7.8 Spatial operators	28
7.8.1 General considerations.....	28
7.8.2 Encoding	30
7.8.3 Operator semantics.....	31
7.8.4 Coordinate reference system handling.....	32
7.9 Temporal operators.....	32

7.9.1	General considerations	32
7.9.2	Encoding	33
7.9.3	Time zone handling	34
7.10	Logical operators	34
7.10.1	General considerations	34
7.10.2	Encoding	35
7.11	Object identifiers	36
7.11.1	General considerations	36
7.11.2	Encoding	36
7.12	Extensions	37
7.12.1	General considerations	37
7.12.2	Extending filter using the fes:Function element	38
7.12.3	Extending filter by adding new elements	38
7.13	Filter capabilities	39
7.14	Encoding	41
7.14.1	Capability categories	41
7.14.2	Conformance clause	41
7.14.3	Id capabilities	43
7.14.4	Scalar capabilities	43
7.14.5	Spatial capabilities	44
7.14.6	Temporal capabilities	45
7.14.7	Functions	47
7.14.8	Extended capabilities	47
8	Sorting	48
8.1	General considerations	48
8.2	Encoding	48
8.3	Exceptions	49
Annex A	(normative) Conformance testing	50
A.1	Test cases for query	50
A.2	Test cases for ad hoc query	50
A.3	Test cases for functions	50
A.4	Test cases for resource identification	50
A.5	Test cases for minimum standard filter	51
A.6	Test cases for standard filter	51
A.7	Test cases for minimum spatial filter	51
A.8	Test cases for spatial filter	51
A.9	Test cases for minimum temporal filter	51
A.10	Test cases for temporal filter	52
A.11	Test cases for version navigation	52
A.12	Test cases for sorting	52
A.13	Test cases for extended operators	52
A.14	Test cases for XPath	52
A.15	Test cases for schema-element() function	52
Annex B	(informative) Filter schema definitions	53
B.1	General considerations	53
B.2	Schema files	53
B.2.1	expr.xsd	53
B.2.2	filter.xsd	53
B.2.3	query.xsd	59
B.2.4	sort.xsd	60
B.2.5	filterCapabilities.xsd	60
B.2.6	filterAll.xsd	64
Annex C	(informative) Examples	65
C.1	General considerations	65
C.2	XPath example	65
C.3	XPath predicate example	68
C.4	XPath schema-element() example	69
C.5	Filter examples	69
C.6	SortBy example	75
C.7	Temporal filter example	77

C.8	Filter capabilities examples	79
Annex D	(informative) EBNF for XPath subset	85
Annex E	(informative) Abstract model	86
E.1	Prerequisites	86
E.2	Predicate	86
E.3	Filter	86
E.4	Query	86
Bibliography	87
