DIN EN 13381-6:2012-09 (E)

Test methods for determining the contribution to the fire resistance of structural members - Part 6: Appl ied protection to concrete filled hollow steel columns

Contents

Page

Foreword 4

1 Scope 6

2 Normative references 8

3 Terms and definitions, symbols and units 8

4 Test equipment 10
4.1 General 10
4.2 Furnace 10

5 Test conditions 10
5.1 General 10
5.2 Support conditions 11
5.3 Number of test specimens 11
5.4 Size of test specimens 11
5.5 Construction of steel test specimens 11
5.5.1 Short and tall concrete filled hollow columns 11
5.5.2 Application of the fire protection material 11
5.6 Composition of test specimen component materials 11
5.6.1 Steel specification 11
5.6.2 Concrete grade 12
5.6.3 Dry sand 12
5.7 Properties of test specimen component materials 12
5.7.1 Fire protection materials - General 12
5.7.2 Fire protection materials - Thickness of applied reactive protection material 12
5.8 Selection of test specimens - Principle of selection 12

6 Installation of the test specimens 13
6.1 Test specimen installation patterns 13
6.2 Furnace Load 13
6.3 Specimen mounting 13

7 Conditioning of the test specimens 13

8 Application of instrumentation 14
8.1 General 14
8.2 Instrumentation for measurement and control of furnace temperature 14
8.2.1 General 14
8.2.2 Furnace temperature in the region of test specimens 14
8.2.3 Instrumentation for the measurement of steel temperatures 14
8.3 Instrumentation for the measurement of pressure 14

9 Test procedure 14
9.1 General 14
9.2 Furnace temperature and pressure 14
9.3 Temperature of steelwork 15
9.4 Observations 15
9.5 Termination of test 15

10 Test results 15
10.1 Acceptability of test results 15
10.2 Presentation of test results in the test report 15

11 Assessment 16
11.1 General 16
11.2 Assessment procedure for thermal performance 16

12 Report of the assessment 16

13 Limits of the applicability of the results of the assessment 17
13.1 General 17
13.2 Permitted fire protection thickness range 17
13.3 Permitted minimum wall thickness 17
13.4 Permitted maximum wall thickness 17
13.5 Permitted minimum diameter 17
13.6 Permitted maximum diameter 17

Annex A (normative) Linear interpolation analysis 21

Annex B (normative) Application, assumptions and limitations of this European Standard 23

B.1 Structural contribution from the concrete core 23
B.2 Stickability correction 23
B.3 Thermal analysis of circular and rectangular concrete filled hollow sections 23

Bibliography 24
