Foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 6

4 Symbols 9

5 Classification 10

6 Designations 11

7 Materials 12

8 Requirements 12
8.1 Tubes 12
8.2 Welding 12
8.3 Length adjustment device 12
8.4 Permanent prevention against unintentional disengagement 12
8.5 Anti hand trap 13
8.6 Overlapping length 13
8.7 Endplates 14

9 Verification 14
9.1 General 14
9.2 Calculation of prop strength 15
9.2.1 General 15
9.2.2 Imperfections 15
9.2.3 Behaviours of inner and outer tube 17
9.2.4 Boundary conditions 17
9.2.5 Verification of prop strength 21
9.3 Verification of the strength of length adjustment device 22
9.4 Verification of the prevention against unintentional disengagement 22
9.5 Confirmation of the calculation results by testing 22

10 Tests 22
10.1 General 22
10.2 Detail tests 22
10.2.1 Compression tests on unthreaded tubes 22
10.2.2 Compression tests on threaded tube 23
10.2.3 Bending tests on threaded tube 25
10.2.4 Tests for the limit eccentricities of prop ends 27
10.2.5 Compression tests on length adjustment device 30
10.3 Test of the prevention against unintentional disengagement 30
10.3.1 Purpose of test 30
10.3.2 Test arrangement 31
10.3.3 Evaluation of test results 31

10.4 Confirmation test for the prop strength 31
10.4.1 Material properties 31
10.4.2 Global test 32

11 Documentation of test results 32

12 Marking 32

13 Assessment 33

14 User manual 33

Annex A (informative) Ongoing production control 34
