

DIN EN 16031:2012-09 (E)

Adjustable telescopic aluminium props - Product specifications, design and assessment by calculation and tests

Contents		Page
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	6
4	Symbols	9
5	Classification	10
6	Designations	11
7	Materials	12
8	Requirements	12
8.1	Tubes	12
8.2	Welding	12
8.3	Length adjustment device	12
8.4	Permanent prevention against unintentional disengagement	12
8.5	Anti hand trap	13
8.6	Overlapping length	13
8.7	Endplates	14
9	Verification	14
9.1	General	14
9.2	Calculation of prop strength	15
9.2.1	General	15
9.2.2	Imperfections	15
9.2.3	Behaviours of inner and outer tube	17
9.2.4	Boundary conditions	17
9.2.5	Verification of prop strength	21
9.3	Verification of the strength of length adjustment device	22
9.4	Verification of the prevention against unintentional disengagement	22
9.5	Confirmation of the calculation results by testing	22
10	Tests	22
10.1	General	22
10.2	Detail tests	22
10.2.1	Compression tests on unthreaded tubes	22
10.2.2	Compression tests on threaded tube	23
10.2.3	Bending tests on threaded tube	25
10.2.4	Tests for the limit eccentricities of prop ends	27
10.2.5	Compression tests on length adjustment device	30
10.3	Test of the prevention against unintentional disengagement	30
10.3.1	Purpose of test	30
10.3.2	Test arrangement	31
10.3.3	Evaluation of test results	31

10.4	Confirmation test for the prop strength	31
10.4.1	Material properties	31
10.4.2	Global test	32
11	Documentation of test results	32
12	Marking	32
13	Assessment	33
14	User manual	33
Annex A (informative) Ongoing production control		34
