DIN EN 15651-1:2012-12 (E)

Sealants for non-structural use in joints in buildings and pedestrian walkways - Part 1: Sealants for facade elements

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 5

4 Requirements 5
4.1 Identification requirements and test methods 5
4.1.1 Short description of the sealant 5
4.1.2 Thermogravimetric test 5
4.1.3 Specific gravity 6
4.1.4 Indentation hardness (Shore hardness) 6
4.2 Conditioning, test procedure and substrates 6
4.3 Performance requirements and test methods for non-structural sealants for facade elements 7
4.3.1 General 7
4.3.2 Sealants for facade elements used in cold climates 8
4.3.3 Resistance to flow 9
4.4 Performance requirements for non-structural sealants for facade elements for interior application only 9
4.5 Release of dangerous substances 9
4.6 Reaction to fire 9
4.6.1 General 9
4.6.2 Mounting and fixing conditions for test samples 9

5 Durability 12

6 Sampling 12

7 Evaluation of conformity 12
7.1 General 12
7.2 Initial type testing 12
7.3 Factory production control 12

8 Marking and labelling 12

Annex A (informative) Example on the frequency of tests for factory production control 13

Annex ZA (informative) Clause of this European Standard addressing the provisions of EU Construction Products Directive 14

ZA.1 Scope and relevant characteristics 14

ZA.2 Procedure for attestation of conformity of non-structural sealants for external and/or internal side of facade elements 16

ZA.2.1 Systems of attestation of conformity 16

ZA.2.2 EC certificate of conformity and EC declaration of conformity 19

ZA.3 CE marking and labelling 23

ZA.3.1 General 23

ZA.3.2 CE marking on the packaging 23

ZA.3.3 CE marking in the accompanying commercial documents 24
