DIN EN ISO 12571:2013-12 (E)

Hygrothermal performance of building materials and products - Determination of hygroscopic sorption properties (ISO 1257 1:2013)

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions, symbols and units 4
3.1 Terms and definitions 4
3.2 Symbols and units 5

4 Principle 5
4.1 Sorption curve 5
4.2 Desorption curve 5

5 Apparatus 6
5.1 Desiccator method 6
5.2 Climatic chamber method 6

6 Test specimens 6
6.1 Specification of the test specimens 6
6.2 Number of test specimens 6

7 Procedure 6
7.1 Test conditions 6
7.2 Desiccator method 7
7.3 Climatic chamber method 8

8 Calculation and expression of results 9
8.1 Hygroscopic sorption 9
8.2 Equilibrium moisture content curves 9

9 Accuracy of measurement 10
9.1 Error in moisture content 10
9.2 Control of environmental conditions 10

10 Test report 11

Annex A (informative) Air relative humidities above saturated solutions in equilibrium 12

Annex B (informative) Preparation of saturated solutions 15

Annex C (informative) Example of the procedure for determining a point on a sorption curve 18

Annex D (informative) Method using a glass jar 19
