ISO/TR 18267:2013-04 (E)

Timber structures - Review of design standards

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Current and draft ISO design standards 1
2.1 Basis for design 1
2.2 Scope and limitations 1
2.3 Standard or guide 2
2.4 Rules-based or engineered approach 2
2.5 Material specifications 2
2.6 Load provisions 3
2.7 Assemblies or components 4
2.8 Construction practice 4
2.9 Commentary 4
2.10 Relationship of the draft laminated bamboo structural design standard 4

3 Adoption or use of these design standards 5

4 Relationship to selected national timber standards 5
4.1 Basis for design 5
4.2 Scope and limitations 6
4.3 Standard or guide 6
4.4 Rules-based or engineered approach 6
4.5 Material specifications 6
4.6 Load provisions 7
4.7 Assemblies or components 8
4.8 Construction practice 8
4.9 Commentary 8

5 Considerations for an ISO/TC 165 design document 8

6 Conclusions 9

7 References 10

Annex A (informative) Factors, issues and options considered by ISO/TC 165 12

Annex B (informative) Overview of ISO structural design documents 18

Annex C (informative) Outline for a Basic Level Standard 25
