|--------------------|---|-------------|
| Foreword .....     |   | 4           |
| Introduction ..... |   | 5           |
| <b>1</b>           | <b>Scope .....</b>  | <b>6</b>    |
| <b>2</b>           | <b>Normative references .....</b>                                     | <b>6</b>    |
| <b>3</b>           | <b>Terms and definitions .....</b>                                    | <b>6</b>    |
| <b>4</b>           | <b>Entry and exit -- General characteristics .....</b>                | <b>8</b>    |
| 4.1                | General .....   | 8           |
| 4.2                | Entry and exit for emergency services and accredited categories ..... | 12          |
| <b>5</b>           | <b>Entry .....</b>  | <b>13</b>   |
| 5.1                | General .....   | 13          |
| 5.2                | Factors affecting the entry capacity .....                            | 13          |
| 5.3                | Calculating an entry capacity .....                                   | 13          |
| 5.4                | Spectator ingress .....   | 13          |
| 5.4.1              | Basic principle .....   | 13          |
| 5.4.2              | The need to count .....   | 14          |
| 5.5                | Design of entrances and entry routes .....                            | 14          |
| 5.6                | External perimeter barrier and passageways .....                      | 15          |
| 5.6.1              | General .....   | 15          |
| 5.6.2              | Queue pre-selection devices .....                                     | 15          |
| 5.6.3              | Access control elements and entry points .....                        | 15          |
| <b>6</b>           | <b>Spectator circulation, routes and areas .....</b>                  | <b>16</b>   |
| 6.1                | General .....   | 16          |
| 6.2                | Circulation - General .....   | 16          |
| 6.3                | Creating a balanced system .....                                      | 16          |
| 6.4                | Multifunctional circulation areas .....                               | 16          |
| 6.5                | Zoning of circulation routes .....                                    | 17          |
| 6.6                | Design of circulation routes and areas .....                          | 17          |
| 6.6.1              | Maintaining safe conditions .....                                     | 17          |
| 6.6.2              | Design .....  | 17          |
| 6.6.3              | Width .....   | 17          |
| 6.6.4              | Headroom .....  | 17          |
| 6.6.5              | Signs .....   | 17          |
| 6.6.6              | Lighting .....  | 17          |
| 6.7                | Provision of clear information .....                                  | 17          |
| 6.8                | Circulation - Within the facility .....                               | 18          |
| 6.9                | Passageways .....   | 18          |
| 6.10               | Ramps .....   | 19          |
| 6.11               | Stairways .....   | 19          |
| 6.11.1             | General .....   | 19          |
| 6.11.2             | Stepped access and stairs for people with special needs .....         | 19          |
| 6.12               | Escalators .....  | 20          |
| 6.13               | Lifts .....   | 20          |
| 6.14               | Concourses .....  | 20          |
| 6.15               | Vomitories .....  | 21          |

|  |  |           |
|--|--|-----------|
| <b>7</b>   | <b>Egress and emergency evacuation .....</b>   | <b>22</b> |
| 7.1  | Basic design principles .....  | 22        |
| 7.2  | Exit capacity .....  | 22        |
| 7.3  | Exit route .....   | 22        |
| 7.4  | Rates of passage .....   | 22        |
| 7.5  | Egress time .....  | 23        |
| 7.6  | Design of exit systems .....   | 23        |
| 7.7  | Emergency evacuation time .....  | 24        |
| 7.8  | Design of emergency evacuation routes .....  | 24        |
| 7.9  | Use of the activity area for emergency evacuation .....  | 25        |
| 7.10   | Provision of gates or openings in an activity area perimeter barrier .....                                       | 26        |
| 7.11   | Exit doors and gates .....   | 26        |
| 7.12   | Electronic securing systems .....  | 27        |
| 7.13   | Emergency escape lighting .....  | 27        |
| 7.14   | Emergency Evacuation for people with special needs .....   | 28        |
| 7.14.1   | Horizontal Escape .....  | 28        |
| 7.14.2   | Vertical Escape .....  | 29        |
| <b>Annex A (informative) Access control elements - Product characteristics .....</b> |  | <b>31</b> |
| <b>A.1</b>   | <b>Full Height Turnstiles .....</b>  | <b>31</b> |
| A.1.1  | General .....  | 31        |
| A.1.2  | Dimensional requirements .....   | 31        |
| A.1.3  | Characteristics .....  | 31        |
| A.1.4  | Ergonomics .....   | 31        |
| A.1.5  | Electric circuits .....  | 32        |
| A.1.6  | Control system .....   | 32        |
| A.1.7  | Functions .....  | 32        |
| A.1.8  | Time-out .....   | 32        |
| A.2  | Technical specifications for the supply of scanning equipment to control access via<br>turnstile entrances ..... | 33        |
| A.2.1  | Control software .....   | 33        |
| A.2.2  | Server .....   | 33        |
| A.2.3  | Scanning device for Turnstile/Cage .....   | 34        |
| <b>Bibliography .....</b>  |  | <b>35</b> |
