<b>Foreword to EN 1997-1:2004</b> .....	<b>5</b>
<b>Foreword to EN 1997-1:2004/A1:2013</b> .....	<b>5</b>
<b>Section 1 General</b> .....	<b>9</b>
1.1 Scope .....	9
1.2 Normative references.....	10
1.3 Assumptions.....	11
1.4 Distinction between Principles and Application Rules .....	11
1.5 Definitions .....	12
1.6 Symbols .....	13
<b>Section 2 Basis of geotechnical design</b> .....	<b>20</b>
2.1 Design requirements.....	20
2.2 Design situations.....	22
2.3 Durability .....	23
2.4 Geotechnical design by calculation.....	24
2.5 Design by prescriptive measures.....	36
2.6 Load tests and tests on experimental models .....	37
2.7 Observational method .....	37
2.8 Geotechnical Design Report .....	37
<b>Section 3 Geotechnical data</b> .....	<b>39</b>
3.1 General .....	39
3.2 Geotechnical investigations .....	39
3.3 Evaluation of geotechnical parameters.....	40
3.4 Ground Investigation Report.....	48
<b>Section 4 Supervision of construction, monitoring and maintenance</b> .....	<b>50</b>
4.1 General .....	50
4.2 Supervision .....	50
4.3 Checking ground conditions.....	52
4.4 Checking construction.....	53
4.5 Monitoring .....	54
4.6 Maintenance.....	55
<b>Section 5 Fill, dewatering, ground improvement and reinforcement</b> .....	<b>56</b>
5.1 General .....	56
5.2 Fundamental requirements .....	56
5.3 Fill construction .....	56
5.4 Dewatering .....	60
5.5 Ground improvement and reinforcement .....	61
<b>Section 6 Spread foundations</b> .....	<b>62</b>
6.1 General .....	62
6.2 Limit states .....	62
6.3 Actions and design situations .....	62
6.4 Design and construction considerations .....	62
6.5 Ultimate limit state design .....	63
6.6 Serviceability limit state design .....	66
6.7 Foundations on rock; additional design considerations .....	68
6.8 Structural design of spread foundations .....	69
6.9 Preparation of the subsoil .....	69

<b>Section 7</b>	<b>Pile foundations</b>	<b>71</b>
7.1	General	71
7.2	Limit states	71
7.3	Actions and design situations	71
7.4	Design methods and design considerations	73
7.5	Pile load tests	75
7.6	Axially loaded piles	77
7.7	Transversely loaded piles	87
7.8	Structural design of piles	89
7.9	Supervision of construction	89
<b>Section 8</b>	<b>Ⓐ<sub>1</sub> Anchors Ⓐ<sub>1</sub></b>	<b>92</b>
8.1	General	92
8.2	Limit states	93
8.3	Design situations and actions	94
8.4	Design and construction considerations	94
8.5	Limit state design of anchors	95
8.6	Tests on anchors	98
8.7	Lock-off load for pre-stressed anchors	99
8.8	Supervision, monitoring and maintenance	99
<b>Section 9</b>	<b>Retaining structures</b>	<b>100</b>
9.1	General	100
9.2	Limit states	100
9.3	Actions, geometrical data and design situations	101
9.4	Design and construction considerations	104
9.5	Determination of earth pressures	105
9.6	Water pressures	108
9.7	Ultimate limit state design	108
9.8	Serviceability limit state design	112
<b>Section 10</b>	<b>Hydraulic failure</b>	<b>114</b>
10.1	General	114
10.2	Failure by uplift	115
10.3	Failure by heave	117
10.4	Internal erosion	117
10.5	Failure by piping	118
<b>Section 11</b>	<b>Overall stability</b>	<b>120</b>
11.1	General	120
11.2	Limit states	120
11.3	Actions and design situations	120
11.4	Design and construction considerations	121
11.5	Ultimate limit state design	122
11.6	Serviceability limit state design	124
11.7	Monitoring	124
<b>Section 12</b>	<b>Embankments</b>	<b>126</b>
12.1	General	126
12.2	Limit states	126
12.3	Actions and design situations	126
12.4	Design and construction considerations	127
12.5	Ultimate limit state design	128
12.6	Serviceability limit state design	129
12.7	Supervision and monitoring	129
<b>Annex A</b>	<b>(normative) Ⓐ<sub>1</sub> Partial and correlation factors for ultimate and serviceability limit states and recommended values Ⓐ<sub>1</sub></b>	<b>131</b>
<b>Annex B</b>	<b>(informative) Background information on partial factors for Design Approaches 1, 2 and 3</b>	<b>143</b>
<b>Annex C</b>	<b>(informative) Sample procedures to determine earth pressures</b>	<b>146</b>
<b>Annex D</b>	<b>(informative) A sample analytical method for bearing resistance calculation</b>	<b>162</b>

**Annex E (informative) A sample semi-empirical method for bearing resistance estimation ..... 165**

**Annex F (informative) Sample methods for settlement evaluation ..... 166**

**Annex G (informative) A sample method for deriving presumed bearing resistance for spread foundations on rock ..... 168**

**Annex H (informative) Limiting values of structural deformation and foundation movement..... 170**

**Annex J (informative) Checklist for construction supervision and performance monitoring..... 172**
