ISO 3008-2:2014-04 (E)

Fire-resistance tests - Part 2: Lift landing door assemblies

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2

4 Test equipment 2

5 Test conditions 2

6 Test specimen 3
6.1 Size of specimen 3
6.2 Number of specimens 3
6.3 Supporting construction 3
6.4 Installation of specimen 3
6.5 Verification 4

7 Conditioning 5

8 Clearances 5

9 Functionality test 5

10 Application of instrumentation 5
10.1 Temperature measurements 5
10.2 Pressure measurements 6
10.3 Gas flow measurement 7
10.4 CO2 concentration 7
10.5 Heat-flux measurement 7
10.6 Deflection 7

11 Test procedure 7
11.1 Gap measurements 7
11.2 Functionality test 11
11.3 Flow measurement verification 11
11.4 Fire test 12

12 Performance criteria 12
12.1 Integrity (E) 12
12.2 Insulation (I) 12
12.3 Radiation (W) 12

13 Termination of the test 12

14 Test report 13

15 Field of direct application of the test results 13

Annex A (normative) Description of the canopy and measuring system 14

Annex B (normative) Standard supporting construction 17

Annex C (normative)Verificationprocedurefortheleakageratemeasurement 18

Annex D (normative)Calculationofleakagerate 19

Annex E (informative)Extrapolationrulefortheleakagerateforhigherliftlanding door assemblies 21

Annex F (informative)Interpretingtheleakageratecurve 23

Annex G (informative)Markinginformation 24
