## Environmental management for concrete and concrete structures - Part 2: System boundary and inventory data

---

| <b>Contents</b>    |   | <b>Page</b> |
|--------------------|---|-------------|
| Foreword .....     |   | iv          |
| Introduction ..... |   | v           |
| 1                  | Scope .....   | 1           |
| 2                  | Normative references .....                          | 1           |
| 3                  | Terms and definitions .....                         | 1           |
| 4                  | System boundary .....                               | 2           |
| 4.1                | General .....                                       | 2           |
| 4.2                | Constituents .....                                  | 2           |
| 4.3                | Reinforcing and prestressing steel .....            | 7           |
| 4.4                | Formwork, falsework, and machinery .....            | 8           |
| 4.5                | Concrete .....                                      | 9           |
| 4.6                | Precast concrete .....                              | 10          |
| 4.7                | Execution of concrete structures .....              | 11          |
| 4.8                | Use of concrete structures .....                    | 13          |
| 4.9                | End phase of concrete and concrete structures ..... | 14          |
| 5                  | Inventory data .....                                | 17          |
| 5.1                | General .....                                       | 17          |
| 5.2                | Constituents .....                                  | 18          |
| 5.3                | Reinforcing and prestressing steel .....            | 21          |
| 5.4                | Formwork, falsework, and machinery .....            | 22          |
| 5.5                | Production of concrete .....                        | 23          |
| 5.6                | Execution of concrete structures .....              | 24          |
| 5.7                | Use of concrete structures .....                    | 25          |
| 5.8                | End phase of concrete and concrete structures ..... | 26          |
| 6                  | Critical review and its storage .....               | 27          |
| Bibliography ..... |   | 28          |
