ISO 13910:2014-05 (E)

Timber structures - Strength graded timber - Test methods for structural properties

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Termsanddefinitions 1

3 Symbols and abbreviated terms 2
3.1 General notation 2
3.2 Subscripts 3

4 Test specimens 3

5 Test conditions 3

6 Testconfigurations 3
6.1 Density 3
6.2 Bending strength and stiffness 4
6.3 Tension strength parallel to the grain 5
6.4 Compression strength parallel to the grain 6
6.5 Shear strength parallel to the grain 7
6.6 Tension strength perpendicular to the grain 9
6.7 Compression strength and stiffness perpendicular to the grain 11
6.8 Torsional shear modulus 13

7 Adjustment for non-reference test conditions 14

8 Test report 15

Annex A (informative) Adjustment factors for non-reference condition 16
