

DIN 18035-7:2014-10 (E)

Sports grounds - Part 7: Synthetic turf areas

Contents		Page
Foreword		4
1	Scope	4
2	Normative references	4
3	Terms and definitions	7
4	Requirements	10
4.1	General	10
4.2	Subgrade (native soil and sub-base)	10
4.2.1	General	10
4.2.2	Preliminary examinations	11
4.2.3	Verification tests	12
4.3	Filter stability	12
4.4	Unbound supporting layer	12
4.5	Unbound levelling layer	15
4.6	Bound supporting layer	16
4.6.1	Asphalt layer	16
4.7	Bound resilient supporting layer	19
4.8	Shockpad and asphalt layer	21
4.9	Shockpad on an unbound levelling layer	23
4.10	Synthetic turf surface	25
4.11	Mineral and elastic infill materials	25
4.12	Environmental impact	26
4.13	Laying the synthetic turf surface	26
4.14	Playing field markings	27
4.15	Watering	27
5	Material characteristics and descriptive features	27
5.1	General information	27
6	Testing	29
6.1	Suitability tests	29
6.2	Quality monitoring	29
6.3	Verification testing	29
7	Test methods	30
7.1	General	30
7.1.1	Test and conditioning conditions	30
7.1.2	Test specimens	30
7.1.3	Procedure	30
7.2	Bending resistance (bending force)	30
7.2.1	Test specimens	30
7.2.2	Test apparatus	30
7.3	Rotational resistance	32
7.3.1	Determination of the rotational resistance	32
7.4	Dimensional stability	33
7.4.1	Test conditions	33
7.4.2	Test specimens	34
7.4.3	Test apparatus	34
7.4.4	Procedure	34

7.4.5	Evaluation	34
7.5	Compressive strain test	34
7.5.1	Determination of residual deformation	34
7.5.2	Determination of residual deformation after material ageing	35
7.6	Accelerated weathering of infill granulate by xenon lamp radiation	35
7.6.1	Test conditions	35
7.6.2	Test specimens	35
7.6.3	Test apparatus	35
7.6.4	Procedure	36
7.6.5	Evaluation	36
7.7	Weathering by hot water and heat	36
7.7.1	Weathering by hot water	36
7.7.2	Weathering by heat exposure	36
7.8	Effects of the synthetic turf on soil and groundwater	37
7.8.1	Sample preparation	37
7.8.2	Elution with water (24-h elution)	37
7.8.3	Elution with water (48-h elution)	37
7.8.4	Extraction with hexane to permit subsequent determination of organic halogen compounds (EOX)	37
7.8.5	Determination of dissolved organic compounds (dissolved organic carbon - DOC)	38
7.8.6	Determination of heavy metal contents	38
7.8.7	Chlorinated paraffin determination	38
7.8.8	Phthalate content determination	39
7.9	Determination of lateral tensile strength	39
7.9.1	Preparation of mixed-material samples	39
7.9.2	Test specimens (laboratory samples or mixed-material samples)	39
7.9.3	Test apparatus	39
7.9.4	Procedure	39
7.9.5	Evaluation	39
8	Care and maintenance	40
	Annex A (informative) Construction/design examples	41
	Annex B (informative) Environmental protection recommendations	42
	Bibliography	43
