## Glass in building - Curved glass - Part 3: Requirements for curved tempered and curved laminated safety glass

---

| <b>Contents</b>       |   | <b>Page</b> |
|-----------------------|---|-------------|
| Foreword .....        |   | iv          |
| Introduction .....    |   | v           |
| 1                     | Scope .....   | 1           |
| 2                     | Normative references .....                                | 1           |
| 3                     | Terms and definitions .....                               | 2           |
| 4                     | Glass products .....                                      | 2           |
| 4.1                   | Curved tempered safety glass .....                        | 2           |
| 4.2                   | Curved laminated safety glass .....                       | 2           |
| 5                     | Fragmentation test for curved tempered safety glass ..... | 3           |
| 5.1                   | General .....   | 3           |
| 5.2                   | Dimensions and number of test specimens .....             | 3           |
| 5.3                   | Test procedure .....                                      | 3           |
| 5.4                   | Assessment of fragmentation .....                         | 5           |
| 5.5                   | Minimum values from the particle count .....              | 5           |
| 5.6                   | Selection of the longest particle .....                   | 6           |
| 5.7                   | Maximum length of longest particle .....                  | 6           |
| 5.8                   | Test Report .....   | 6           |
| 6                     | Other physical characteristics .....                      | 6           |
| 6.1                   | Thermal durability .....                                  | 6           |
| 6.2                   | Mechanical strength .....                                 | 6           |
| 7                     | Marking .....   | 7           |
| 8                     | Pendulum impact performance of safety glass .....         | 7           |
| 8.1                   | General .....   | 7           |
| 8.2                   | Problem specific to curved safety glass .....             | 7           |
| 8.3                   | Test method .....   | 7           |
| Annex A (normative)   | Pendulum impact test methods .....                        | 8           |
| Annex B (informative) | Example of particle count .....                           | 9           |
