DIN EN ISO 18674-1:2015-09 (E)

Geotechnical investigation and testing - Geotechnical monitoring by field instrumentation - Part 1: General rules (ISO 18674-1:2015)

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and symbols 5
3.1 Terms 5
3.2 Symbols 7

4 Principal requirements 8
4.1 Geotechnical monitoring in connection with geotechnical design 8
4.2 Geotechnical monitoring in connection with specific questions 8
4.3 Requirements of a geotechnical monitoring project 8
4.4 Geodetic measurements 9
4.5 Safety requirements 9

5 Requirements of a geotechnical monitoring system 9
5.1 General 9
5.2 Robustness 10
5.3 Influencing factors 10
5.4 Redundancy 10
5.5 Stability of sensor signal 10
5.6 Function check and calibration 11

6 Location of measuring points and geotechnical parameters 11
6.1 Location of measuring points 11
6.1.1 The measuring points can be located at free surfaces, at the interface between any two media, or inside of a medium 11
6.2 Measurement and monitoring of geotechnical parameters 11

7 Carrying out the measurements 12

8 Data processing and verification 12

9 Reporting 13
9.1 Installation report 13
9.2 Monitoring report 14

Annex A (normative) Minimum requirements on content of instrument data sheets 16

Annex B (normative) Geotechnical measurements in boreholes 17

Annex C (informative) Field measurements in connection with the design and construction of geotechnical structures 20

Annex D (informative) Measurement and monitoring of geotechnical key parameters 22

Annex E (informative) Types of instruments and monitoring methods commonly used 24

Bibliography 30
