## Thermal performance in the built environment - Determination of air flow rate in building applications by field measuring methods

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Symbols and abbreviated terms .....	2
5	Types and selection of measurement method .....	2
5.1	Types of measurement methods and their application .....	2
5.2	Selection of measurement method .....	2
6	Basic specifications measuring instruments and utilization methods .....	2
6.1	General .....	2
6.2	Thermal anemometer .....	2
6.3	Pitot tube and manometer .....	3
6.4	Vane-type anemometer .....	3
7	Field measuring methods of air flow rate of ventilation and air conditioning systems .....	3
7.1	Multipoint air velocity measurement method .....	3
7.1.1	Measurement in a duct .....	4
7.1.2	Measurement method at duct connection of air-conditioning system .....	6
7.1.3	Selection of measuring instruments .....	7
7.2	Tracer gas measurement method .....	7
7.2.1	Formula .....	7
7.2.2	Tracer gas .....	8
7.2.3	Procedures for measuring air flow rate .....	8
7.2.4	Tracer gas injection procedures .....	9
7.2.5	Tracer gas sampling procedures .....	10
7.3	Flow hood method .....	10
7.3.1	General .....	10
7.3.2	Equipment composition .....	10
7.3.3	Measurement procedures .....	11
7.4	Pressure compensation measurement method .....	11
7.4.1	Equipment composition .....	12
7.4.2	Measurement procedures .....	13
7.4.3	Effective application range .....	13
7.5	Pressure difference measurement method .....	13
7.5.1	Measuring equipment .....	13
7.5.2	Selection of measuring instruments .....	14
7.5.3	Measuring procedures .....	14
8	Uncertainty .....	15
8.1	Uncertainty of each measurement .....	15
8.1.1	Multipoint air velocity measurement method .....	15
8.1.2	Tracer gas measurement method .....	15
8.1.3	Flow hood method .....	15
8.1.4	Pressure-loss compensation measurement method .....	15
8.1.5	Pressure difference measurement method .....	15

8.2	Analysis of uncertainty .....	15
9	Measurement report .....	16
9.1	Information related to measured object .....	16
9.2	Items related to measuring method .....	16
9.3	Measurement results .....	16
Annex A (normative)	Position for cross-section measurement in a duct using multipoint measurement method .....	17
Annex B (normative)	Accuracy of air velocity measurement instrument .....	21
Annex C (informative)	Types of tracer gas .....	22
Bibliography	.....	23
