

DIN 4102-16:2015-09 (E)

Fire behaviour of building materials and building components - Part 16: "Brandschacht" tests

Contents		Page
Foreword		4
1	Scope	6
2	Normative references	6
3	Brief description of method	7
4	Specimen preparation	7
4.1	General	7
4.2	Colour variations	7
4.3	Finishes (paints, coatings, wallcoverings, etc.)	7
4.4	Adjacent materials	8
4.5	Bonding agents	9
5	Number and size of specimens and test pieces	9
5.1	General	9
5.2	Reducing the scope of testing of Brandschacht tests	10
5.3	Number of tests for materials of various densities and thicknesses	11
6	Conditioning and ageing of specimens	11
6.1	Conditioning of specimens	11
6.2	Conditioning to determine ageing behaviour	11
6.3	Ageing of plastic drainage pipes and fittings	12
7	Requirements for specific materials	13
7.1	Internal wall and ceiling linings applied using adhesives	13
7.2	Wood chipboard	13
7.3	Other types of covering	14
7.3.1	High-pressure laminates (HPL) or continuous pressure laminates (CPL) (laminated sheet) used to cover wood chipboard	14
7.3.2	Other coverings on substrates not covered by this standard	14
7.4	Back-ventilated cladding	15
7.5	Thermal insulation composite systems	15
7.6	Mineral fibre insulating materials, with or without metal facing	15
7.7	Rigid polystyrene foam boards	15
7.8	Rigid polystyrene foam composite panels	16
7.9	Adhesives for use with rigid polystyrene foam board	16
7.10	Sandwich panels	16
7.11	Loose or granular insulating materials	16
7.12	In-situ foam	17
7.13	Intumescent coatings and coatings for wood and wood-based panel products	17
7.13.1	Specimen materials	17
7.13.2	Surface finishes	18
7.14	Solid timber with fire retardants applied by the vacuum/pressure process	18
7.15	Textiles	18
7.16	Fire retardants for textiles	18
7.16.1	General	18
7.16.2	Test fabrics	19
7.16.3	Fire behaviour after washing	19
7.16.4	Fire behaviour after dry cleaning	19

7.16.5	Fire behaviour after exposure to natural weathering	19
7.16.6	Number of specimens	19
7.17	Pipes, pipe insulation, lagging, jacketing	20
7.17.1	Pipes	20
7.17.2	Pipe insulation (hinged or tubular, with or without jacketing applied at works)	20
7.17.3	Cladding for insulated pipes	21
7.18	Flexible ventilation ducting	21
7.19	Jointing products (at edges)	22
7.19.1	General	22
7.19.2	Sealants	22
7.19.3	Compressible soft foam strips	22
7.20	Raised access floor panels	22
7.21	Roof underlays	22
7.22	Decorative elements	23
7.23	Cables and cable coatings	23
7.24	Plastic sheeting (hollow core or multiwall sheeting, e.g. polycarbonate)	23
8	Testing	23
8.1	General	23
8.2	Exposure to flame	23
8.3	Distance of specimens to burner	23
8.4	Testing aged specimens	24
8.5	Testing weathered specimens	24
8.6	Termination of the test	24
9	Evaluation of test results	24
9.1	Determining residual length	24
9.2	Materials with a thickness > 80 mm	25
10	Test certificate	25
