| European foreword ..... |   | 5           |
| Introduction .....      |   | 6           |
| 1                       | Scope .....                                       | 7           |
| 2                       | Normative references .....                        | 7           |
| 3                       | Terms and definitions .....                       | 7           |
| 4                       | Test equipment .....                              | 9           |
| 5                       | Test conditions .....                             | 9           |
| 6                       | Test specimen .....                               | 9           |
| 6.1                     | Size .....  | 9           |
| 6.2                     | Number .....                                      | 9           |
| 6.3                     | Design .....                                      | 9           |
| 6.3.1                   | General .....                                     | 9           |
| 6.3.2                   | Vertical joints .....                             | 10          |
| 6.3.3                   | Horizontal joints .....                           | 10          |
| 6.3.4                   | Restraint .....                                   | 10          |
| 6.4                     | Construction .....                                | 11          |
| 6.5                     | Verification .....                                | 11          |
| 7                       | Installation of test specimen .....               | 11          |
| 7.1                     | General .....                                     | 11          |
| 7.2                     | Supporting construction .....                     | 11          |
| 8                       | Conditioning .....                                | 11          |
| 9                       | Application of instrumentation .....              | 12          |
| 9.1                     | Thermocouples .....                               | 12          |
| 9.1.1                   | Furnace thermocouples (plate thermometers) .....  | 12          |
| 9.1.2                   | Unexposed face thermocouples .....                | 12          |
| 9.2                     | Pressure .....                                    | 13          |
| 9.3                     | Deflection .....                                  | 13          |
| 9.4                     | Radiation .....                                   | 13          |
| 9.5                     | Impact .....                                      | 13          |
| 10                      | Test procedure .....                              | 13          |
| 11                      | Performance criteria .....                        | 13          |
| 12                      | Test report .....                                 | 13          |
| 13                      | Field of direct application of test results ..... | 14          |
| 13.1                    | General .....                                     | 14          |
| 13.2                    | Extension of width .....                          | 14          |
| 13.3                    | Extension of height .....                         | 14          |
| 13.4                    | Supporting constructions .....                    | 15          |
| 13.4.1                  | Standard supporting constructions .....           | 15          |

|   |   |           |
|---|---|-----------|
| 13.4.2  | Non-standard supporting constructions .....   | 15        |
| <b>Annex A (normative) Specific requirements for testing glazed elements or non-loadbearing walls incorporating glazing .....</b>   |   |           |
|   |   | <b>36</b> |
| A.1   | General .....   | 36        |
| A.2   | Test specimen design .....  | 36        |
| A.3   | Test specimen instrumentation .....   | 37        |
| A.3.1   | General .....   | 37        |
| A.3.2   | Average temperature rise .....  | 37        |
| A.3.2.1   | Fully glazed test specimen .....  | 37        |
| A.3.2.2   | Partly glazed test specimen .....   | 37        |
| A.3.3   | Maximum temperature rise .....  | 37        |
| A.3.4   | Radiation measurement .....   | 38        |
| A.3.5   | Deflection measurement .....  | 38        |
| A.4   | Field of direct application of test results .....                                       | 38        |
| A.4.1   | General .....   | 38        |
| A.4.2   | Field of direct application rules not requiring overrun time .....                      | 38        |
| A.4.2.1   | Glazed element .....  | 38        |
| A.4.2.1.1   | Installation angle .....  | 38        |
| A.4.2.1.2   | Height of the glazed element .....  | 39        |
| A.4.2.1.3   | Width of the glazed element .....   | 39        |
| A.4.2.2   | Glazing system (see Figure 16) .....  | 39        |
| A.4.2.2.1   | Linear dimensions .....   | 39        |
| A.4.2.2.2   | Aspect ratio .....  | 39        |
| A.4.2.2.3   | Glazing beads .....   | 40        |
| A.4.2.3   | Framing system (see Figure 16) .....  | 40        |
| A.4.2.4   | Supporting constructions .....  | 40        |
| A.4.2.4.1   | General .....   | 40        |
| A.4.2.4.2   | Standard supporting constructions .....   | 40        |
| A.4.2.4.3   | Non-standard supporting construction .....  | 41        |
| A.4.3   | Field of direct application rules requiring overrun time .....                          | 41        |
| A.4.3.1   | General .....   | 41        |
| A.4.3.2   | Dimensions of the glazed element .....  | 41        |
| A.4.3.2.1   | Height .....  | 41        |
| A.4.3.2.2   | Width .....   | 41        |
| A.4.3.3   | Dimensions and area of individual rectangular glass panes .....                         | 42        |
| A.4.3.4   | Aspect ratio .....  | 42        |
| A.4.3.5   | Area of individual circular, triangular and four side non-rectangular glass panes ..... | 42        |
| <b>Annex B (normative) Specific requirements for testing non-loadbearing external and internal walls designed to span horizontally between two independently proven fire resisting vertical structural elements .....</b> |   |           |
|   |   | <b>43</b> |
| B.1   | General .....   | 43        |
| B.2   | Test specimen .....   | 43        |
| B.2.1   | Size .....  | 43        |
| B.2.2   | Number .....  | 43        |
| B.2.3   | Design .....  | 43        |
| B.2.4   | Boundary and Restraint conditions .....   | 43        |
| B.3   | Test specimen instrumentation .....   | 44        |
| B.4   | Test procedure .....  | 44        |
| B.5   | Performance criteria .....  | 44        |
| B.6   | Field of direct application of test results .....                                       | 44        |
| B.6.1   | General .....   | 44        |
| B.6.2   | Supporting constructions .....  | 45        |
| B.6.3   | Extension of width .....  | 45        |
| B.6.4   | Extension of height .....   | 45        |
| <b>Bibliography .....</b>   |   |           |
