

# DIN EN 13914-1:2016-09 (E)

## Design, preparation and application of external rendering and internal plastering - Part 1: External rendering

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
1	Scope .....	6
2	Normative references .....	7
3	Terms and definitions .....	8
4	Essential principles and building programme .....	11
4.1	Essential principles .....	11
4.2	Building programme .....	12
5	Materials .....	12
5.1	Types of render .....	12
5.2	Materials for site-made renders .....	14
5.3	Water .....	15
5.4	Materials for reinforcement, carrier and beads .....	15
5.5	Fixings .....	16
5.6	Furring .....	17
6	Design considerations .....	17
6.1	General .....	17
6.2	Factors affecting the design of the rendering system .....	17
6.3	Characteristics of background .....	18
6.4	Adequacy of the background .....	19
6.5	Durability of the render .....	20
6.6	Exposure conditions .....	21
6.7	Resistance to rain penetration .....	21
6.8	Resistance to water rising from the ground without pressure (capillary water) .....	22
6.9	Soluble salts .....	22
6.10	Effects of atmospheric pollution .....	22
6.11	Effects of freezing .....	22
6.12	Resistance to impact or abrasion .....	23
6.13	Corrosion of metals .....	23
6.14	Occurrence of cracking .....	23
6.15	Thermal considerations .....	26
6.16	Protection afforded by architectural features and functions .....	26
6.17	Selection of renders .....	36
6.18	Number, thickness and relative strength of coats .....	37
6.19	Types of finish .....	40
6.20	Colour and texture .....	40
7	Work on site, preparation and application of renderings .....	41
7.1	General .....	41
7.2	Storage of materials .....	41
7.3	Scaffolding .....	41
7.4	Protection of adjacent surfaces .....	41
7.5	Preparation of background .....	41
7.6	Proportioning of mix materials on site .....	44
7.7	Mixing on site .....	44
7.8	Forming architectural features .....	45

7.9	Application of the various coats .....	45
8	Maintenance and repair (other than restoration) .....	46
8.1	General .....	46
8.2	Inspection .....	47
8.3	Repairs to cracks .....	47
8.4	Repair of hollow or detached areas .....	47
8.5	Overcoming unsatisfactory appearance .....	48
8.6	Overcoming water penetration .....	49
Annex A(informative) Example on the selection of site mixed prescribed renders mixed in accordance with background type .....		50
A.1	General .....	50
A.2	Strong mixes .....	50
A.3	Moderately strong mixes .....	50
A.4	Weak mixes .....	50
Annex B(informative) Restoration of renders on old and historic buildings .....		51
B.1	General .....	51
B.2	Preliminary investigations .....	51
B.3	Preparatory work .....	53
B.4	Restoration systems and measures .....	53
B.5	Design .....	54
B.6	Application .....	54
Annex C(informative) Examples of products for reinforcement, carrier and beads .....		56
C.1	General .....	56
C.2	Figures .....	56
Annex D(informative) Examples of types of finish .....		60
