

DIN EN ISO 12572:2017-05 (E)

Hygrothermal performance of building materials and products - Determination of water vapour transmission properties - Cup method (ISO 12572:2016)

Contents		Page
European foreword		4
Foreword		5
1	Scope	6
2	Normative references	6
3	Terms, definitions, symbols, units and subscripts	6
	3.1 Terms and definitions	6
	3.2 Symbols and units	7
	3.3 Subscripts	8
4	Principle	8
5	Apparatus	8
6	Test specimens	9
	6.1 General principles for preparation of test specimens	9
	6.2 Dimensions of test specimens	9
	6.2.1 Shape and fit	9
	6.2.2 Exposed area	9
	6.2.3 Thickness of test specimens	9
	6.3 Number of test specimens	10
	6.4 Conditioning of test specimens	10
	6.5 Testing low resistance specimens	10
7	Procedure	10
	7.1 Test conditions	10
	7.2 Preparation of specimen and test assembly	12
	7.3 Test procedure	12
8	Calculation and expression of results	13
	8.1 Mass change rate	13
	8.2 Density of water vapour flow rate	14
	8.3 Water vapour permeance	14
	8.4 Water vapour resistance	15
	8.5 Water vapour permeability	15
	8.6 Water vapour resistance factor	15
	8.7 Water vapour diffusion-equivalent air layer thickness	16
9	Accuracy of measurement	16
	9.1 General	16
	9.2 Specimen area	16
	9.3 Specimen thickness	16
	9.4 Sealants	17
	9.5 Weighing precision	17
	9.6 Control of environmental conditions	17
	9.7 Variations in barometric pressure during test	17
10	Test report	17
Annex A (normative)	Methods suitable for self-supporting materials	19
Annex B (normative)	Methods suitable for loose fills	21
Annex C (normative)	Methods suitable for membranes and foils	23
Annex D (normative)	Methods suitable for mastics and sealants	24
Annex E (normative)	Methods suitable for paint, varnishes, etc.	26

Annex F (normative) Correction for the effect of a masked edge of a specimen	27
Annex G (normative) Correction for resistance of air layers	29
Annex H (normative) Method for calculating the water vapour resistance of the air layer in the cup	30
Annex I (informative) Weighing repeatability, weighing interval and specimen size needed to achieve desired accuracy	31
Annex J (informative) Conversion table for water vapour transmission units	32
Bibliography	33
