DIN EN ISO 13786:2018-04 (E)

Thermal performance of building components - Dynamic thermal characteristics - Calculation methods (ISO 13786:2017)

Contents

Page

European foreword ... **3**

Foreword ... **5**

Introduction ... **6**

1 Scope ... **9**

2 Normative references ... **9**

3 Terms and definitions ... **9**
3.1 Definitions valid for any component ... 10
3.2 Definitions valid only for one dimensional heat flow ... 11
3.3 Other ... 13

4 Symbols and subscripts ... **13**
4.1 Symbols ... 13
4.2 Subscripts ... 14
4.3 Specific symbols ... 14

5 Description of the method ... **14**
5.1 Output ... 14
5.2 General description ... 14

6 Calculation of dynamic thermal properties ... **14**
6.1 Output data ... 14
6.2 Calculation time intervals ... 15
6.3 Input data ... 15
6.4 Period of the thermal variations ... 16
6.5 Heat capacity ... 16

7 Heat transfer matrix of a multi-layer component ... **16**
7.1 General ... 16
7.2 Procedure ... 16
7.3 Heat transfer matrix of a homogeneous layer ... 17
7.4 Heat transfer matrix of plane air cavities ... 17
7.5 Heat transfer matrix of a building component ... 17

8 Dynamic thermal characteristics ... **18**
8.1 Characteristics for any component ... 18
8.2 Characteristics for components consisting of plane and homogeneous layers ... 18
8.2.1 Thermal admittances and periodic thermal conductances ... 18
8.2.2 Modified admittance for internal partitions ... 18
8.2.3 Areal heat capacities ... 18
8.2.4 Periodic thermal transmittance and decrement factor ... 19

9 Report ... **19**
9.1 Calculation report ... 19
9.2 Summary of results ... 20

Annex A (normative) **Input and method selection data sheet — Template** ... **21**

Annex B (informative) **Input and method selection data sheet — Default choices** ... **23**

Annex C (normative) **Simplified calculation of the heat capacity** ... **25**

Bibliography ... **27**
