

# DIN EN 1992-4:2019-04 (E)

## Eurocode 2 - Design of concrete structures - Part 4: Design of fastenings for use in concrete

---

| <b>Contents</b>         |  | <b>Page</b> |
|-------------------------|--|-------------|
| European foreword ..... |  | 5           |
| <b>1</b>                | <b>Scope .....</b>   | <b>9</b>    |
| 1.1                     | General .....  | 9           |
| 1.2                     | Type of fasteners and fastening groups .....                     | 9           |
| 1.3                     | Fastener dimensions and materials .....                          | 11          |
| 1.4                     | Fastener loading .....   | 12          |
| 1.5                     | Concrete strength and type .....                                 | 12          |
| 1.6                     | Concrete member loading .....                                    | 12          |
| <b>2</b>                | <b>Normative references .....</b>                                | <b>12</b>   |
| <b>3</b>                | <b>Terms, definitions, symbols and abbreviations .....</b>       | <b>13</b>   |
| 3.1                     | Terms and definitions .....                                      | 13          |
| 3.2                     | Symbols and abbreviations .....                                  | 20          |
| 3.2.1                   | Indices .....  | 20          |
| 3.2.2                   | Superscripts .....   | 21          |
| 3.2.3                   | Actions and resistances (listing in alphabetical order) .....    | 22          |
| 3.2.4                   | Concrete and steel .....   | 27          |
| 3.2.5                   | Fasteners and fastenings, reinforcement .....                    | 28          |
| 3.2.6                   | Units .....  | 30          |
| <b>4</b>                | <b>Basis of design .....</b>                                     | <b>30</b>   |
| 4.1                     | General .....  | 30          |
| 4.2                     | Required verifications .....                                     | 31          |
| 4.3                     | Design format .....  | 31          |
| 4.4                     | Verification by the partial factor method .....                  | 32          |
| 4.4.1                   | Partial factors for actions .....                                | 32          |
| 4.4.2                   | Partial factors for resistance .....                             | 32          |
| 4.5                     | Project specification .....                                      | 35          |
| 4.6                     | Installation of fasteners .....                                  | 36          |
| 4.7                     | Determination of concrete condition .....                        | 36          |
| <b>5</b>                | <b>Durability .....</b>  | <b>37</b>   |
| <b>6</b>                | <b>Derivation of forces acting on fasteners - analysis .....</b> | <b>37</b>   |
| 6.1                     | General .....  | 37          |
| 6.2                     | Headed fasteners and post-installed fasteners .....              | 38          |
| 6.2.1                   | Tension loads .....  | 38          |
| 6.2.2                   | Shear loads .....  | 41          |
| 6.3                     | Anchor channels .....  | 44          |
| 6.3.1                   | General .....  | 44          |
| 6.3.2                   | Tension loads .....  | 45          |
| 6.3.3                   | Shear loads .....  | 46          |
| 6.4                     | Forces assigned to supplementary reinforcement .....             | 47          |
| 6.4.1                   | General .....  | 47          |
| 6.4.2                   | Tension loads .....  | 47          |
| 6.4.3                   | Shear loads .....  | 47          |
| <b>7</b>                | <b>Verification of ultimate limit state .....</b>                | <b>48</b>   |
| 7.1                     | General .....  | 48          |

|  |            |
|--|------------|
| <b>DIN EN 1992-4:2019-04 EN 1992-4:2018 (E) 7.2 Headed and post-installed fasteners</b> .....                              | <b>49</b>  |
| 7.2.1 Tension load .....   | 49         |
| 7.2.2 Shear load .....   | 64         |
| 7.2.3 Combined tension and shear loads .....   | 76         |
| 7.3 Fasteners in redundant non-structural systems .....  | 77         |
| 7.4 Anchor channels .....  | 77         |
| 7.4.1 Tension load .....   | 77         |
| 7.4.2 Shear load .....   | 87         |
| 7.4.3 Combined tension and shear loads .....   | 95         |
| <b>8 Verification of ultimate limit state for fatigue loading</b> .....  | <b>97</b>  |
| 8.1 General .....  | 97         |
| 8.2 Derivation of forces acting on fasteners - analysis .....  | 97         |
| 8.3 Resistance .....   | 98         |
| 8.3.1 Tension load .....   | 98         |
| 8.3.2 Shear load .....   | 99         |
| 8.3.3 Combined tension and shear load .....  | 99         |
| <b>9 Verification for seismic loading</b> .....  | <b>100</b> |
| 9.1 General .....  | 100        |
| 9.2 Requirements .....   | 100        |
| 9.3 Derivation of forces acting on fasteners .....   | 102        |
| 9.4 Resistance .....   | 102        |
| <b>10 Verification for fire resistance</b> .....   | <b>102</b> |
| <b>11 Verification of serviceability limit state</b> .....   | <b>102</b> |
| <b>Annex A (normative) Additional rules for verification of concrete elements due to loads applied by fastenings</b> ..... | <b>103</b> |
| A.1 General .....  | 103        |
| A.2 Verification of the shear resistance of the concrete member .....  | 103        |
| <b>Annex B (informative) Durability</b> .....  | <b>105</b> |
| B.1 General .....  | 105        |
| B.2 Fasteners in dry, internal conditions .....  | 105        |
| B.3 Fasteners in external atmospheric or in permanently damp internal exposure condition                                   | 105        |
| B.4 Fasteners in high corrosion exposure by chloride and sulphur dioxide .....   | 105        |
| <b>Annex C (normative) Design of fastenings under seismic actions</b> .....  | <b>106</b> |
| C.1 General .....  | 106        |
| C.2 Performance categories .....   | 106        |
| C.3 Design criteria .....  | 107        |
| C.4 Derivation of forces acting on fasteners - analysis .....  | 109        |
| C.4.1 General .....  | 109        |
| C.4.2 Addition to EN 1998-1:2004, 4.3.3.5 .....  | 110        |
| C.4.3 Addition to EN 1998-1:2004, 4.3.5.1 .....  | 110        |
| C.4.4 Additions and alterations to EN 1998-1:2004, 4.3.5.2 .....   | 110        |
| C.4.5 Additions and alterations to EN 1998-1:2004, 4.3.5.4 .....   | 112        |
| C.5 Resistance .....   | 112        |
| C.6 Displacements of fasteners .....   | 115        |
| <b>Annex D (informative) Exposure to fire - design method</b> .....  | <b>116</b> |
| D.1 General .....  | 116        |
| D.2 Partial factors .....  | 116        |
| D.3 Actions .....  | 116        |

|   |            |
