

# DIN EN 1992-4:2019-04 (E)

## Eurocode 2 - Design of concrete structures - Part 4: Design of fastenings for use in concrete

---

Contents	Page
European foreword .....	5
1 Scope .....	9
1.1 General .....	9
1.2 Type of fasteners and fastening groups .....	9
1.3 Fastener dimensions and materials .....	11
1.4 Fastener loading .....	12
1.5 Concrete strength and type .....	12
1.6 Concrete member loading .....	12
2 Normative references .....	12
3 Terms, definitions, symbols and abbreviations .....	13
3.1 Terms and definitions .....	13
3.2 Symbols and abbreviations .....	20
3.2.1 Indices .....	20
3.2.2 Superscripts .....	21
3.2.3 Actions and resistances (listing in alphabetical order) .....	22
3.2.4 Concrete and steel .....	27
3.2.5 Fasteners and fastenings, reinforcement .....	28
3.2.6 Units .....	30
4 Basis of design .....	30
4.1 General .....	30
4.2 Required verifications .....	31
4.3 Design format .....	31
4.4 Verification by the partial factor method .....	32
4.4.1 Partial factors for actions .....	32
4.4.2 Partial factors for resistance .....	32
4.5 Project specification .....	35
4.6 Installation of fasteners .....	36
4.7 Determination of concrete condition .....	36
5 Durability .....	37
6 Derivation of forces acting on fasteners - analysis .....	37
6.1 General .....	37
6.2 Headed fasteners and post-installed fasteners .....	38
6.2.1 Tension loads .....	38
6.2.2 Shear loads .....	41
6.3 Anchor channels .....	44
6.3.1 General .....	44
6.3.2 Tension loads .....	45
6.3.3 Shear loads .....	46
6.4 Forces assigned to supplementary reinforcement .....	47
6.4.1 General .....	47
6.4.2 Tension loads .....	47
6.4.3 Shear loads .....	47
7 Verification of ultimate limit state .....	48
7.1 General .....	48

<b>DIN EN 1992-4:2019-04 EN 1992-4:2018 (E) 7.2 Headed and post-installed fasteners .....</b>	<b>49</b>
7.2.1   Tension load .....	49
7.2.2   Shear load .....	64
7.2.3   Combined tension and shear loads .....	76
7.3     Fasteners in redundant non-structural systems .....	77
7.4     Anchor channels .....	77
7.4.1   Tension load .....	77
7.4.2   Shear load .....	87
7.4.3   Combined tension and shear loads .....	95
 8       Verification of ultimate limit state for fatigue loading .....	97
8.1     General .....	97
8.2     Derivation of forces acting on fasteners - analysis .....	97
8.3     Resistance .....	98
8.3.1   Tension load .....	98
8.3.2   Shear load .....	99
8.3.3   Combined tension and shear load .....	99
 9       Verification for seismic loading .....	100
9.1     General .....	100
9.2     Requirements .....	100
9.3     Derivation of forces acting on fasteners .....	102
9.4     Resistance .....	102
 10      Verification for fire resistance .....	102
 11      Verification of serviceability limit state .....	102
 <b>Annex A (normative) Additional rules for verification of concrete elements due to loads applied by fastenings .....</b>	<b>103</b>
A.1     General .....	103
A.2     Verification of the shear resistance of the concrete member .....	103
 <b>Annex B (informative) Durability .....</b>	<b>105</b>
B.1     General .....	105
B.2     Fasteners in dry, internal conditions .....	105
B.3     Fasteners in external atmospheric or in permanently damp internal exposure condition	105
B.4     Fasteners in high corrosion exposure by chloride and sulphur dioxide .....	105
 <b>Annex C (normative) Design of fastenings under seismic actions .....</b>	<b>106</b>
C.1     General .....	106
C.2     Performance categories .....	106
C.3     Design criteria .....	107
C.4     Derivation of forces acting on fasteners - analysis .....	109
C.4.1   General .....	109
C.4.2   Addition to EN 1998-1:2004, 4.3.3.5 .....	110
C.4.3   Addition to EN 1998-1:2004, 4.3.5.1 .....	110
C.4.4   Additions and alterations to EN 1998-1:2004, 4.3.5.2 .....	110
C.4.5   Additions and alterations to EN 1998-1:2004, 4.3.5.4 .....	112
C.5     Resistance .....	112
C.6     Displacements of fasteners .....	115
 <b>Annex D (informative) Exposure to fire - design method .....</b>	<b>116</b>
D.1     General .....	116
D.2     Partial factors .....	116
D.3     Actions .....	116

<b>DIN EN 1992-4:2019-04 EN 1992-4:2018 (E) D.4 Resistance .....</b>	<b>117</b>
D.4.1 General .....	117
D.4.2 Tension load .....	117
D.4.3 Shear load .....	119
D.4.4 Combined tension and shear load .....	120
<b>Annex E (normative) Characteristics for the design of fastenings to be provided by European Technical Products Specification .....</b>	<b>121</b>
<b>Annex F (normative) Assumptions for design provisions regarding execution of fastenings .....</b>	<b>124</b>
F.1 General .....	124
F.2 Post-installed fasteners .....	124
F.3 Headed fasteners .....	125
F.4 Anchor channels .....	125
<b>Annex G (informative) Design of post-installed fasteners - simplified methods .....</b>	<b>126</b>
G.1 General .....	126
G.2 Method B .....	126
G.3 Method C .....	127
<b>Bibliography .....</b>	<b>128</b>
