| <b>Foreword</b> .....          |  | <b>6</b>    |
| <b>Introduction</b> .....      |  | <b>7</b>    |
| <b>1</b>                       | <b>Scope</b> .....                                       | <b>11</b>   |
| <b>2</b>                       | <b>Normative references</b> .....                        | <b>11</b>   |
| <b>3</b>                       | <b>Terms and definitions</b> .....                       | <b>12</b>   |
| <b>4</b>                       | <b>Symbols and subscripts</b> .....                      | <b>13</b>   |
| 4.1                            | Symbols.....   | 13          |
| 4.2                            | Subscripts.....  | 13          |
| <b>5</b>                       | <b>Description of the method</b> .....                   | <b>14</b>   |
| 5.1                            | Output.....  | 14          |
| 5.2                            | General description.....                                 | 14          |
| 5.3                            | Periodic coefficients.....                               | 15          |
| <b>6</b>                       | <b>Calculation of heat transfer via the ground</b> ..... | <b>14</b>   |
| 6.1                            | Output data.....   | 14          |
| 6.2                            | Calculation time intervals.....                          | 16          |
| 6.3                            | Input data.....  | 17          |
| 6.4                            | Thermal properties.....                                  | 17          |
| 6.4.1                          | Thermal properties of the ground.....                    | 17          |
| 6.4.2                          | Thermal properties of building materials.....            | 18          |
| 6.4.3                          | Surface resistances.....                                 | 18          |
| 6.5                            | Internal temperature and climatic data.....              | 18          |
| 6.5.1                          | Internal temperature.....                                | 18          |
| 6.5.2                          | Climatic data.....                                       | 18          |
| 6.6                            | Thermal transmittance and heat flow rate.....            | 19          |
| 6.6.1                          | Thermal transmittance.....                               | 19          |
| 6.6.2                          | Thermal bridges at edge of floor.....                    | 19          |
| 6.6.3                          | Calculation of heat flow rate.....                       | 19          |
| 6.6.4                          | Effect of ground water.....                              | 19          |
| 6.6.5                          | Special cases.....                                       | 20          |
| 6.7                            | Parameters used in the calculations.....                 | 20          |
| 6.7.1                          | Characteristic dimension of floor.....                   | 20          |
| 6.7.2                          | Equivalent thickness.....                                | 21          |
| <b>7</b>                       | <b>Calculation of thermal transmittances</b> .....       | <b>21</b>   |
| 7.1                            | Slab-on-ground floor.....                                | 21          |
| 7.2                            | Suspended floor.....                                     | 23          |
| 7.3                            | Heated basement.....                                     | 25          |
| 7.3.1                          | General.....   | 25          |
| 7.3.2                          | Basement floor.....                                      | 27          |
| 7.3.3                          | Basement walls.....                                      | 27          |
| 7.3.4                          | Heat transfer from whole basement.....                   | 28          |
| 7.4                            | Unheated basement.....                                   | 28          |
| 7.5                            | Partly heated basement.....                              | 29          |
| 7.6                            | Effective thermal resistance of floor construction.....  | 29          |
