

DIN EN 12697-10:2018-03 (E)

Bituminous mixtures - Test methods - Part 10: Compactability

Contents		Page
	European foreword	3
1	Scope	4
2	Normative references	4
3	Terms and definitions	4
4	Principle	5
5	Apparatus	5
5.1	Impact compaction	5
5.2	Gyratory compaction	5
5.3	Vibratory compaction	6
6	Test procedure	6
6.1	Impact compaction	6
6.1.1	Different specimens for each level of compaction energy, recording increases in density ..	6
6.1.2	One specimen for all levels of compaction energy, recording decreases in thickness	6
6.2	Gyratory compaction	6
6.3	Vibratory compaction	6
7	Calculation and expression of results	7
7.1	Impact compaction	7
7.1.1	Different specimens for each level of compaction energy, recording increases in density ..	7
7.1.2	Same specimen for all levels of compaction energy, recording decreases in thickness	9
7.2	Gyratory compaction	10
7.3	Vibratory compaction	11
8	Test report	11
9	Precision	11
9.1	Impact compaction	11
9.1.1	General	11
9.1.2	One specimen for all levels of compaction energy, recording decreases in thickness	12
9.2	Gyratory compaction	12
9.3	Vibratory compaction	12
