

# DIN EN 12697-10:2018-03 (E)

## Bituminous mixtures - Test methods - Part 10: Compactability

---

<b>Contents</b>		<b>Page</b>
	European foreword .....	3
1	Scope .....	4
2	Normative references .....	4
3	Terms and definitions .....	4
4	Principle .....	5
5	Apparatus .....	5
5.1	Impact compaction .....	5
5.2	Gyratory compaction .....	5
5.3	Vibratory compaction .....	6
6	Test procedure .....	6
6.1	Impact compaction .....	6
6.1.1	Different specimens for each level of compaction energy, recording increases in density ..	6
6.1.2	One specimen for all levels of compaction energy, recording decreases in thickness .....	6
6.2	Gyratory compaction .....	6
6.3	Vibratory compaction .....	6
7	Calculation and expression of results .....	7
7.1	Impact compaction .....	7
7.1.1	Different specimens for each level of compaction energy, recording increases in density ..	7
7.1.2	Same specimen for all levels of compaction energy, recording decreases in thickness .....	9
7.2	Gyratory compaction .....	10
7.3	Vibratory compaction .....	11
8	Test report .....	11
9	Precision .....	11
9.1	Impact compaction .....	11
9.1.1	General .....	11
9.1.2	One specimen for all levels of compaction energy, recording decreases in thickness .....	12
9.2	Gyratory compaction .....	12
9.3	Vibratory compaction .....	12
