European foreword ... **4**

Foreword ... **5**

Introduction ... **6**

1 Scope ... **7**

2 Normative references ... **7**

3 Terms and definitions ... **7**

4 Measurement method and its selection ... **8**

4.1 General ... 8

4.2 Concentration decay method ... 10

4.2.1 Principle ... 10

4.2.2 Two-point decay method ... 11

4.2.3 Multipoint decay method ... 12

4.2.4 Step-down exhaust concentration method ... 12

4.2.5 Pulse method ... 13

4.3 Continuous dose method ... 14

4.3.1 Principle ... 14

4.3.2 Average inverse concentration method ... 14

4.3.3 Average concentration method ... 15

4.3.4 Stationary concentration method ... 16

4.4 Constant concentration method ... 16

4.5 Type of tracer gas ... 16

4.6 Measurement apparatus ... 17

4.6.1 General ... 17

4.6.2 Tracer gas dosing device ... 19

4.6.3 Tracer gas sampling apparatus ... 20

4.6.4 Gas analyser ... 20

5 Procedure ... **20**

5.1 Building preparations ... 20

5.2 Ancillary measurements ... 20

5.3 Concentration decay method ... 21

5.3.1 Calculation of two-point and multi-point methods ... 21

5.3.2 Procedure of two-point and multi-point methods ... 22

5.3.3 Calculation of step-down exhaust concentration method and pulse method ... 23

5.3.4 Procedure of the step-down exhaust concentration method and pulse method ... 24

5.4 Continuous dose methods ... 27

5.4.1 Calculation of average of inverse concentration method ... 27

5.4.2 Procedure of average of inverse concentration method ... 28

5.4.3 Calculation of average concentration method ... 29

5.4.4 Procedure of average concentration method ... 30

5.4.5 Calculation of stationary concentration method ... 31

5.4.6 Procedure of stationary concentration method ... 31

5.5 Constant concentration method ... 33

5.5.1 Calculation of constant concentration method ... 33

5.5.2 Procedure of constant concentration method ... 33

6 Accuracy ... **34**

6.1 General ... 34

6.2 Tracer gas dose procedure and room concentration distribution ... 35

6.3 Tracer gas sampling and storage method 35
6.4 Tracer gas concentration measuring instruments 35
6.4.1 General 35
6.4.2 Resolution 35
6.4.3 Tracer gas analyser drift 35
6.4.4 Accuracy of tracer gas analyser 35
6.4.5 Calibration of tracer gas analyser 36
6.4.6 Standard gas concentration 36
6.5 Changes in outside wind and outdoor air temperature and schedule of air conditioning system 36

7 Test report 36
7.1 General 36
7.2 Details necessary to identify the simulation tested 37
7.3 Details of heating and ventilation systems 37
7.4 Test conditions and apparatus 37
7.5 Collected data and results 37
7.6 Date of the test 38

Annex A (normative) **Confidence intervals 39**

Annex B (normative) **Method to estimate ventilation rate Q_v and effective mixed zone volume V_{emz} simultaneously[3][4] 42**

Annex C (informative) **Considerations when measuring the ventilation rate of large spaces 47**

Annex D (informative) **Effects of internal and external temperature difference, temperature change, and outdoor air concentration change during the measurement period 48**

Annex E (informative) **Estimation error minimizing method in two-point and multi-point decay methods 52**

Annex F (informative) **Propagation of error analysis 57**
