## Bases for design of structures - Seismic actions on structures

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Symbols and abbreviated terms .....	3
5	Bases of seismic design .....	4
6	Principles of seismic design .....	4
6.1	Site conditions .....	4
6.2	Structural configuration .....	5
6.2.1	Plan irregularities .....	5
6.2.2	Vertical irregularities .....	5
6.3	Influence of nonstructural elements .....	5
6.4	Strength and ductility .....	5
6.5	Deformation of the structure .....	6
6.6	Response control systems .....	6
6.7	Foundations .....	6
7	Principles of evaluating seismic actions .....	6
7.1	Variable and accidental actions .....	6
7.2	Dynamic and equivalent static analyses .....	6
7.2.1	Equivalent static analysis .....	6
7.2.2	Dynamic analysis .....	7
7.2.3	Nonlinear static analysis .....	7
7.3	Criteria for determination of seismic actions .....	7
7.3.1	Seismicity of the region .....	7
7.3.2	Site conditions .....	7
7.3.3	Dynamic properties of the structure .....	7
7.3.4	Consequence of failure of the structure .....	8
7.3.5	Spatial variation of earthquake ground motion .....	8
8	Evaluation of seismic actions by equivalent static analysis .....	8
8.1	Equivalent static loadings .....	8
8.1.1	ULS .....	8
8.1.2	SLS .....	9
8.2	Seismic action effects within the seismic force-resisting system .....	10
8.3	Seismic actions on parts of structures .....	10
9	Evaluation of seismic actions by dynamic analysis .....	11
9.1	General .....	11
9.2	Dynamic analysis procedures .....	11
9.3	Response spectrum analysis .....	11
9.4	Response history analysis and earthquake ground motions .....	11
9.4.1	Recorded earthquake ground motions .....	11
9.4.2	Simulated earthquake ground motions .....	12

<b>9.5</b>	<b>Model of the structure .....</b>	<b>12</b>
<b>9.6</b>	<b>Evaluation of analytical results .....</b>	<b>13</b>
<b>10</b>	<b>Nonlinear static analysis .....</b>	<b>13</b>
<b>11</b>	<b>Estimationofparaseismicinfluences .....</b>	<b>13</b>
<b>Annex A (informative)</b>	<b>Load factors as related to the reliability of the structure, seismic hazard zoning factor and representative values of earthquake ground motion intensity .....</b>	<b>14</b>
<b>Annex B (informative)</b>	<b>Normalized design response spectrum .....</b>	<b>18</b>
<b>Annex C (informative)</b>	<b>Seismic force distribution parameters for equivalent static analysis .....</b>	<b>21</b>
<b>Annex D (informative)</b>	<b>Structural design factor for linear analysis .....</b>	<b>25</b>
<b>Annex E (informative)</b>	<b>Combination of components of seismic action .....</b>	<b>28</b>
<b>Annex F (informative)</b>	<b>Torsional moments .....</b>	<b>30</b>
<b>Annex G (informative)</b>	<b>Damping ratio .....</b>	<b>32</b>
<b>Annex H (informative)</b>	<b>Dynamic analysis .....</b>	<b>35</b>
<b>Annex I (informative)</b>	<b>Nonlinear static analysis and capacity spectrum method .....</b>	<b>40</b>
<b>Annex J (informative)</b>	<b>Soil-structure interaction .....</b>	<b>44</b>
<b>Annex K (informative)</b>	<b>Seismic design of high-rise buildings .....</b>	<b>47</b>
<b>Annex L (informative)</b>	<b>Deformation limits .....</b>	<b>49</b>
<b>Annex M (informative)</b>	<b>Response control systems .....</b>	<b>50</b>
<b>Annex N (informative)</b>	<b>Non-engineered construction .....</b>	<b>54</b>
<b>Annex O (informative)</b>	<b>Tsunami actions .....</b>	<b>56</b>
<b>Annex P (informative)</b>	<b>Paraseismicinfluences .....</b>	<b>59</b>
<b>Bibliography .....</b>		<b>60</b>
