DIN EN 1436:2018-03 (Englisc h)

Road marking materials - Road marking performance for road users and test methods

Contents

Page

European foreword 4

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 7

4 Requirements 8
4.1 General 8
4.2 Reflection in daylight or under road lighting 9
4.2.1 General 9
4.2.2 Luminance coefficient under diffuse illumination Qd 9
4.2.3 Luminance factor 10
4.3 Retroreflection under vehicle headlamp illumination 10
4.4 Colour 12
4.4.1 Chromaticity in daylight 12
4.4.2 Chromaticity of retroreflected light 13
4.5 Skid resistance 14

Annex A (normative) Measurement method for the luminance coefficient under diffuse illumination Qd 15

A.1 Introduction 15
A.2 Spectral match 16
A.3 Standard measuring condition of measuring equipment 16
A.4 Practical applications of measuring equipment 17
A.5 Calibration of measuring equipment 18
A.6 Uncertainty of measurement 18

Annex B (normative) Measurement method for the coefficient of retroreflected luminance RL 20

B.1 Introduction 20
B.2 Spectral match of measuring equipment 21
B.3 Standard measuring condition of measuring equipment 21
B.4 Practical applications of measuring equipment 22
B.4.1 General 22
B.4.2 Portable instruments 22
B.4.3 Vehicle mounted instruments 23
B.5 Calibration of measuring equipment 25
B.6 Condition of wetness 25
B.7 Condition of rain 26
B.8 Uncertainty of measurement 26

Annex C (normative) Measuring method for the luminance factor and the chromaticity co-ordinates x and y 28

C.1 Standard measuring condition for the measurement of the luminance factor and the chromaticity co-ordinates x and y in daylight 28

C.2 Standard measuring condition for the measurement of the chromaticity co- ordinates x and y of retroreflected light 28
C.3 Measuring equipment 28
C.4 Uncertainty of measurement 28
