

DIN EN 1436:2018-03 (Englisc h)

Road marking materials - Road marking performance for road users and test methods

Contents		Page
European foreword		4
Introduction		6
1 Scope		7
2 Normative references		7
3 Terms and definitions		7
4 Requirements		8
4.1 General		8
4.2 Reflection in daylight or under road lighting		9
4.2.1 General		9
4.2.2 Luminance coefficient under diffuse illumination Qd		9
4.2.3 Luminance factor		10
4.3 Retroreflection under vehicle headlamp illumination		10
4.4 Colour		12
4.4.1 Chromaticity in daylight		12
4.4.2 Chromaticity of retroreflected light		13
4.5 Skid resistance		14
Annex A (normative) Measurement method for the luminance coefficient under diffuse illumination Qd		15
A.1 Introduction		15
A.2 Spectral match		16
A.3 Standard measuring condition of measuring equipment		16
A.4 Practical applications of measuring equipment		17
A.5 Calibration of measuring equipment		18
A.6 Uncertainty of measurement		18
Annex B (normative) Measurement method for the coefficient of retroreflected luminance RL		20
B.1 Introduction		20
B.2 Spectral match of measuring equipment		21
B.3 Standard measuring condition of measuring equipment		21
B.4 Practical applications of measuring equipment		22
B.4.1 General		22
B.4.2 Portable instruments		22
B.4.3 Vehicle mounted instruments		23
B.5 Calibration of measuring equipment		25
B.6 Condition of wetness		25
B.7 Condition of rain		26
B.8 Uncertainty of measurement		26
Annex C (normative) Measuring method for the luminance factor and the chromaticity co-ordinates x and y		28
C.1 Standard measuring condition for the measurement of the luminance factor and the chromaticity co-ordinates x and y in daylight		28

C.2	Standard measuring condition for the measurement of the chromaticity co- ordinates x and y of retroreflected light	28
C.3	Measuring equipment	28
C.4	Uncertainty of measurement	28
	Bibliography	29
