ISO/TR 52022-2:2017-06 (E)

Energy performance of buildings - Thermal, solar and daylight prope rties of building components and elements - Part 2: Explanation and justification

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols and subscripts 2

5 Brief description of the methods 2
5.1 Outputs of the method 2
5.2 General description of the methods 2

6 ISO 10077-1 Thermal performance of windows, doors and shutters - Calculation of thermal transmittance - Part 1: General 2
6.1 General 2
6.2 Thermal transmittance of the glazing 3
6.3 Additional thermal resistance of windows with closed shutters 3

7 ISO 10077-2 Thermal performance of windows, doors and shutters - Calculation of thermal transmittance - Part 2: Numerical method for frames 3
7.1 General 3
7.2 Calculation principle 3

8 ISO 12631 Thermal performance of curtain walling - Calculation of thermal transmittance 4
8.1 General 4
8.2 Calculation examples 4

9 ISO 52022-1 Energy performance of buildings -- Thermal, solar and daylight properties of building components and elements -- Part 1: Simplified calculation method of the solar and daylight characteristics for solar protection devices combined with glazing 4
9.1 General 4
9.2 Data for typical glazing and solar protection devices 5
9.3 Solar transmittance of solar protection devices 5
9.4 Calculation example 5

10 ISO 52022-3 Energy performance of buildings -- Thermal, solar and daylight properties of building components and elements -- Part 3: Detailed calculation method of the solar and daylight characteristics for solar protection devices combined with glazing 6
10.1 General 6
10.2 Equivalent solar and light optical characteristics for louvres or venetian blinds 6
10.3 Calculation example 6

Annex A (informative) ISO 10077-1: Thermal transmittance of double and triple glazing 7

Annex B (informative) ISO 10077-1: Additional thermal resistance for windows with closed shutters 9

Annex C (informative) ISO 12631: Component method: Calculation example 12

Annex D (informative) ISO 12631: Single assessment method: Calculation example 17

Annex E (informative) ISO 52022-1: Data for typical glazing and solar protection devices 20

Annex F (informative) ISO 52022-1: Example of calculation of a solar protection device in combination with glazing 21

Annex G (informative) Extended methodology for the determination of equivalent solar and light optical characteristics for louvres or venetian blinds 23

Annex H (informative) ISO 52022-3: Calculation example 45
