## Determination of particle density by sedimentation methods - Part 1: Isopycnic interpolation approach

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Symbols .....	2
5	Basic principle of method .....	2
6	Measuring techniques to determine the direction of gravitational and centrifugal migration of dispersed particles .....	4
7	Preparation of samples .....	5
7.1	Solutions .....	5
7.2	Dispersing procedure .....	6
8	Measurements .....	7
9	Data analysis .....	7
9.1	General .....	7
9.2	Graphical interpolation .....	8
9.3	Two point interpolation .....	8
9.4	Linear or non-linear fit .....	9
10	Reference materials and measurement uncertainty .....	10
10.1	Reference materials .....	10
10.2	Measurement uncertainty .....	10
Annex A (informative)	Discrimination between sedimentation or creaming/flotation by bottom focused backscattering intensity .....	12
Annex B (informative)	Determination based on measurement of direct migration velocity .....	15
Annex C (informative)	Linearization of migration velocity versus density plots .....	22
Annex D (informative)	Buoyant density centrifugation .....	24
Annex E (informative)	Propagation of uncertainty for isopycnic velocity in the case of linear interpolation according to Formula (4) .....	25
Bibliography .....		27
