Determination of particle density by sedimentation methods - Part 1: Isopycnic interpolation approach

| Contents | | Page |
|-----------------------|---|-------------|
| Foreword | | iv |
| Introduction | | v |
| 1 | Scope | 1 |
| 2 | Normative references | 1 |
| 3 | Terms and definitions | 1 |
| 4 | Symbols | 2 |
| 5 | Basic principle of method | 2 |
| 6 | Measuring techniques to determine the direction of gravitational and centrifugal migration of dispersed particles | 4 |
| 7 | Preparation of samples | 5 |
| 7.1 | Solutions | 5 |
| 7.2 | Dispersing procedure | 6 |
| 8 | Measurements | 7 |
| 9 | Data analysis | 7 |
| 9.1 | General | 7 |
| 9.2 | Graphical interpolation | 8 |
| 9.3 | Two point interpolation | 8 |
| 9.4 | Linear or non-linear fit | 9 |
| 10 | Reference materials and measurement uncertainty | 10 |
| 10.1 | Reference materials | 10 |
| 10.2 | Measurement uncertainty | 10 |
| Annex A (informative) | Discrimination between sedimentation or creaming/flotation by bottom focused backscattering intensity | 12 |
| Annex B (informative) | Determination based on measurement of direct migration velocity | 15 |
| Annex C (informative) | Linearization of migration velocity versus density plots | 22 |
| Annex D (informative) | Buoyant density centrifugation | 24 |
| Annex E (informative) | Propagation of uncertainty for isopycnic velocity in the case of linear interpolation according to Formula (4) | 25 |
| Bibliography | | 27 |
