Determination of particle density by sedimentation methods - Part 1: Isopycnic interpolation approach

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Symbols	2
5	Basic principle of method	2
6	Measuring techniques to determine the direction of gravitational and centrifugal migration of dispersed particles	4
7	Preparation of samples	5
7.1	Solutions	5
7.2	Dispersing procedure	6
8	Measurements	7
9	Data analysis	7
9.1	General	7
9.2	Graphical interpolation	8
9.3	Two point interpolation	8
9.4	Linear or non-linear fit	9
10	Reference materials and measurement uncertainty	10
10.1	Reference materials	10
10.2	Measurement uncertainty	10
Annex A (informative) Discrimination between sedimentation or creaming/flotation by bottom focused backscattering intensity		12
Annex B (informative) Determination based on measurement of direct migration velocity		15
Annex C (informative) Linearization of migration velocity versus density plots		22
Annex D (informative) Buoyant density centrifugation		24
Annex E (informative) Propagation of uncertainty for isopycnic velocity in the case of linear interpolation according to Formula (4)		25
Bibliography		27
