ISO/TS 19021:2018-05 (E)

Test method for determination of gas concentrations in ISO 5659-2 using Fourier transform infrared spectroscopy

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Principle 2

5 Apparatus for combustion of test specimen and for cone radiator calibration 2

6 Gas sampling system 2
6.1 General arrangement 2
6.2 Sampling probe 3
6.3 Main filter 4
6.4 Sampling line before gas cell 4
6.5 Secondary filter 4
6.6 FTIR gas cell 5
6.7 Conditioning of sampling flow and pump capacity 5
6.8 Sampling flow rate 5
6.9 FTIR Spectrometer 5

7 Calibrations 6
7.1 General calibrations 6
7.2 Chamber leakage test 6
7.3 Gas analyser calibration 6

8 Conditioning 6

9 Test environment 7

10 Pre-test conditions 7

11 Test procedure 7
11.1 Principle 7
11.2 Operation before each test 7
11.3 Operation during a test 8
11.4 Operation after each test 9

12 Gas species analysis and correction 9
12.1 General 9
12.2 Calculation of corrected volume fraction 9
12.3 Calculation of time shift 10

13 Test report 10

14 Test precision 11

Annex A (informative) Typical FTIR calibration procedure at commissioning or after major changes 12

Annex B (informative) Accuracy (trueness and precision) of the test method 15

Bibliography 23
