DIN EN 14592:2022-08 (E)

Timber structures - Dowel-type fasteners - Requirements

Contents

Page

European foreword 3

1 Scope 4

2 Normative references 5

3 Terms, definitions, symbols, units and abbreviated terms 8
3.1 Terms and definitions 8
3.2 Symbols, units and abbreviated terms 10

4 General product characteristics - Testing, assessment and sampling method 11
4.1 Corrosion resistance 11
4.2 Low cycle ductility (seismic performance) 15
4.3 Reaction to fire 15

5 Product specific characteristics - Testing, assessment and sampling method 16
5.1 Nails 16
5.2 Staples 19
5.3 Screws 21
5.4 Dowels 26
5.5 Bolts and nuts 27

6 Assessment and verification of constancy of performance - AVCP 29
6.1 General 29
6.2 Assessment of performance 29
6.3 Verification of constancy of performance 37

Annex A (normative) Test methods for alternative coatings 48

Annex B (informative) Corrosivity of atmospheric environments and timber 52

Annex C (normative) Methods for measuring zinc thicknesses 56

Annex D (normative) Selection of test specimens - Specifications on wood density 57

Annex E (normative) Test to determine seismic performance 60

Annex F (normative) Characteristic withdrawal parameter for dowel-type fasteners with Type 3 coating 65

Annex G (normative) Specifications for materials and geometry properties 67
